Sabbatical Opportunities

We invite you to spend a sabbatical with us at the School of Engineering Education at Purdue University helping to transform engineering education based on scholarship and research.

The School is responsible for the First-Year Engineering Program, including First-Year Honors; the undergraduate Interdisciplinary Engineering Program; the world's first PhD program in engineering education; and INSPIRE, the Institute for P-12 Engineering Research and Learning. We have 21 faculty, 8 postdoctoral researchers, and 75 PhD students in engineering education, as well as 21 graduates of our PhD program. Approximately 1700 students enter the First-Year Engineering Program each year, and there are 75 students in the Interdisciplinary Engineering Program.

We offer numerous possible sabbatical opportunities, including but not limited to:

- Share your education practice and research experiences and insights with us.
- Explore an eclectic range of engineering education research.
- Acquire new research skills or conduct research in our "living laboratory."
- Develop new research, teaching, or outreach collaborations with our faculty.
- Experience teaching in the state-of-the-art *Ideas to Innovation Learning Laboratory*.
- Audit our innovative graduate courses in engineering education.
- Participate in new course or program development and/or evaluation.
- Work with our diverse range of postdoctoral and graduate researchers.
- Learn about research in PreK-to-12 engineering education through INSPIRE.
- Be part of policy formation in relation to engineering education.
- Reflect on possible futures of engineering and engineering education.

If you are considering a sabbatical, please contact **Dr. David F. Radcliffe**, Kamyar Haghighi Head of the School of Engineering Education and Epistemology Professor of Engineering Education, at dradcliffe@purdue.edu to explore sabbatical opportunities at Purdue.
