Julia Spadaccini Bio

- Graduated in December of 2005 with my MSCE from Purdue (Concentration: Construction Engineering and Management), Received a BSCE (Focus Area: Structures) from Cornell in 2004
- Member of WIEP- Graduate Mentoring Program and a TA at Purdue
- Undergraduate campus organizations included ASCE (Secretary my Senior Year), ASCE, SWE, and AOPi Sorority
- Decided I wanted to be an Engineer after taking Chemistry in high school and always enjoying math; Had always thought I would design stadiums and skyscrapers, so surprised myself a bit when I decided to work for an oil company instead
- Reasons I choose to work For ExxonMobil: Multitude of career paths, new assignments every couple of years, international experience, hands on approach to executing projects, ability to influence project execution in engineering and construction without doing technical nitty gritty engineering calculations, community involvement, being part of projects with millions of construction hours in the field!
- Current job is as an Project Execution Planning Engineer for a $3Billion Downstream Refinery Project in Asia; past jobs included cost estimating, project controls engineer and a field engineer for a $500M refinery expansion project, Project Manager for Production Company (for Angola and Chad)
- Outside of work interests include running marathons, peak bagging (skiing), live music, baking, and traveling (have visited 40states and over a dozen countries)
