# ▲ The Kids' Farm Safety Day-Camp

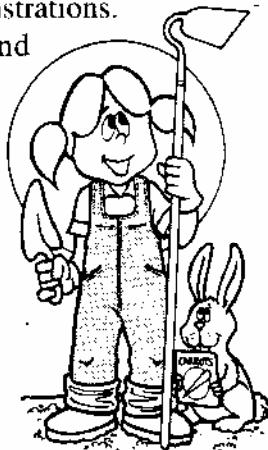

## Preventing Injuries Through Education

The purpose of this one-day camp is to help prevent injuries by teaching children age 6-14 about farm hazards, and providing them (and parents) practical strategies for preventing or avoiding common hazards to children.

The camp will emphasize fun, interactive, hands-on types of demonstrations.

Campers, instructors, and parents will share in this enjoyable and valuable educational experience.

Make plans to join us for a fun day of safety education on the farm.

Each year farm work-related injuries kill hundreds of farm and rural children in the U.S. and injure thousands more. At least four Somestate children lost their lives in farm work-related incidents last year.\*

\* Statistics compiled by the Whutsitz University Agricultural Safety and Health Program.

I understand that:

1. First aid will be available at the camp and medical and/or hospital care will be provided in case of serious illness or injury. I understand that if serious illness or injury occurs, I will be notified. If it is impossible to contact me, I give permission for emergency treatment or surgery as recommended by the attending physician.
2. One of the purposes of the **Kids' Farm Safety Day-Camp** is to teach the safe use of equipment. Actual demonstrations of equipment involving participants will be closely supervised by camp instructors and coordinators. However, I acknowledge there is the possibility that an accident could occur. I release the instructors, coordinators, and sponsors, harmless from all claims in the event of injury to my child so long as due care has been exercised by these parties.

I have read and understand the above information.
