Determine the pressure difference between points X and Y in the system shown below.

## SOLUTION:

First indicate some reference points in the manometer system as shown in the figure below.

Now determine the pressure at the various reference points.

$$
\begin{align*}
& p_{1}=p_{X}+\rho_{\mathrm{A}} g h_{1}  \tag{1}\\
& p_{2}=p_{1}-\rho_{\mathrm{B}} g h_{2}  \tag{2}\\
& p_{3}=p_{2}-\rho_{\mathrm{C}} g\left(h_{3}-h_{2}\right)  \tag{3}\\
& p_{4}=p_{3}+\rho_{\mathrm{D}} g\left(h_{3}-h_{4}\right)  \tag{4}\\
& p_{Y}=p_{4}-\rho_{\mathrm{E}} g h_{5} \tag{5}
\end{align*}
$$

Now combine Eqns. (1) - (5).
$\therefore p_{Y}=p_{X}+\rho_{\mathrm{A}} g h_{1}-\rho_{\mathrm{B}} g h_{2}-\rho_{\mathrm{C}} g\left(h_{3}-h_{2}\right)+\rho_{\mathrm{D}} g\left(h_{3}-h_{4}\right)-\rho_{\mathrm{E}} g h_{5}$
