

## CONTENTS

|  |  |
|--|--|
| Preface .....  |  |
| Local Organizing Committee, Acknowledgment of Support and Sponsorship, Session<br>Chairmen and Paper Reviewers ..... |  |
| International Advisory Committee and Symposia Locations .....  |  |

## GENERAL INVITED LECTURES

|  |  |
|--|--|
| Boltzmann Equation and Hydrodynamics Beyond the Navier-Stokes Level ( <i>Harold Grad<br/>Lecture</i> ) ..... |  |
| A. V. Bobylev  |  |
| Dusty Plasma in the Earth and in Space: Experiments ( <i>Lloyd Thomas Lecture</i> ) .....                    |  |
| V. E. Fortov, O. F. Petrov and O. S. Vaulina   |  |
| Kinetic Theory in Vehicular Traffic Flow Modeling ( <i>Special Invited Lecture</i> ) .....                   |  |
| K. T. Waldeer  |  |

## CHAPTER 1 KINETIC AND TRANSPORT THEORY

|   |  |
|---|--|
| Kinetic Theory of Nanoparticles Transport and Relaxation Processes in Gases and Liquids ....            |  |
| V. Ya. Rudyak ( <i>Invited</i> )  |  |
| Generalized Stefan-Maxwell Diffusion Equations for Multicomponent Mixtures of<br>Polyatomic Gases ..... |  |
| V. M. Zhdanov   |  |
| Rarefaction Effect on Heterogeneous Reaction Rate. Temperature Jump on a Porous Surface ..              |  |
| A. I. Erofeev, O. G. Friedlander and M. N. Kogan  |  |
| Kinetic Description of Classical Matter Infalling in Black Holes .....                                  |  |
| P. Nicolini and M. Tessarotto   |  |
| On Generalized Non-Equilibrium Thermodynamics of Rarefied Gas .....                                     |  |
| V. I. Roldughin   |  |
| Description of Transport Processes in Intensive Parameters.....   |  |
| M. A. Rydalevskaya  |  |
| Generalized Boltzmann Physical Kinetics: Theory, Main Results and Problems .....                        |  |
| B. V. Alexeev   |  |
| On the First Order Chemical Reaction Rates in Non-Equilibrium Gas Flows .....                           |  |
| E. V. Kustova, E. A. Nagnibeda and D. Giordano  |  |
| Couette Flow Solution for Regularized 13 Moment Equations .....   |  |
| H. Struchtrup, T. Thatcher and M. Torrilhon   |  |
| About Nanoparticle Friction Force in Gases and Liquids .....  |  |
| V. Ya. Rudyak, A. A. Belkin and S. L. Krasnolutskii   |  |
| Non-Classical Diffusion in Dense Gases and Liquids .....  |  |
| V. Ya. Rudyak and A. A. Belkin  |  |
| Boundary Conditions for Strongly Perturbed Rarefied Gas .....   |  |
| Yu. E. Gorbachev and I. S. Nikitin  |  |

## CHAPTER 2

### BOLTZMANN AND RELATED EQUATIONS

|   |  |
|---|--|
| Macroscopic Models for Non-Equilibrium Flows of Monatomic Gas and Normal Solutions ...                                      | A. I. Erofeev and O. G. Friedlander ( <i>Invited</i> )   |
| Grad's Thirteen Moment Method for a Heterogeneous Dispersed Medium .....  | C. Croizet and R. Gatignol                               |
| New Forms of the Boltzmann Collision Integral .....   | V. L. Saveliev   |
| Stable Equations to Second Order in the Knudsen Number for the Fluid Dynamics Variables ..                                  | L. H. Söderholm  |
| A Simple Model Kinetic Equation for Inelastic Maxwell Particles .....   | A. Santos  |
| Several Properties of the Matrix Elements of the Collision Integral of the Boltzmann Equation                               | A. Ya. Ender and I. A. Ender                             |
| The Boltzmann Equation for a Gas with Rotational Degrees of Freedom on the Basis of a Statistical Model .....               | V. V. Aristov and V. A. Rykov                            |
| Dissociation and Recombination of a Diatomic Gas in a Background Medium .....   | M. Bisi and G. Spiga                                     |
| Regularized 13-Moment-Equations .....   | M. Torrilhon   |
| Weak Shock Wave Solutions for the Discrete Boltzmann Equation .....   | N. Bernhoff and A. V. Bobylev                            |
| Dual Variational Principles of the Linear Boltzmann Equation .....  | A. M. Bishaev and V. A. Rykov                            |
| On the Uniqueness of Continuous Inverse Kinetic Theory for Incompressible Fluids .....                                      | M. Tessarotto and M. Ellero                              |
| Strong Breakdown of Equipartition in Uniform Granular Mixtures .....  | A. Santos and J. W. Dufty                                |
| On the Existence of a Shock Wave Solution for the Boltzmann Equation with a Modified Collision Term .....                   | A. Sakurai and S. Takahashi                              |
| Simulation of Shock Wave Structure in Nitrogen with Realistic Rotational Spectrum and Molecular Interaction Potential ..... | F. G. Tcheremissine, V. I. Kolobov and R. R. Arslanbekov |
| General Methods of the Construction of Discrete Kinetic Models with Given Conservation Laws .....                           | A. V. Bobylev and M. C. Vinerean                         |

## CHAPTER 3

### NUMERICAL SOLUTIONS OF KINETIC EQUATIONS

|   |   |
|---|---|
| Lattice Boltzmann Method – Current Status and Prospects for Computing Compressible Flows at Moderate Knudsen Numbers .....                                      | R. K. Agarwal ( <i>Invited</i> )              |
| Arbitrary Post-Collision Velocities in a Discrete Velocity Scheme for the Boltzmann Equation  | P. L. Vaghese                                 |
| On the Treatment of Strong Evaporation and Condensation Flows of a Vapor at the Fluid Dynamic Level – Fluid Dynamic Formulation for Phase Change Problems ..... | Y. Onishi, T. Tanaka, D. Ichieda and H. Miura |

|  |   |
|--|---|
| True Direction Equilibrium Flux Method Applications on Rectangular 2D Meshes .....   | M. N. Macrossan, M. R. Smith, M. V. Metchnik and P. A. Pinto  |
| Unified Solver for Rarefied and Continuum Flows in Multi-Component Gas Mixtures .....  | V. I. Kolobov, R. R. Arslanbekov, V. V. Aristov, A. A. Frolova, S. A. Zabelok and F. G. Tcheremissine |
| Analytical and Numerical Normal Solutions of the Boltzmann Equation for Highly Nonequilibrium<br>Fourier and Couette Flows .....                                     | M. A. Gallis, J. R. Torczynski, D. J. Rader, M. Tij and A. Santos                                     |
| Numerical Study of the Spiral Cylindrical Couette Flow of Rarefied Gas .....   | E. M. Shakhov and V. A. Titarev   |
| Multi-Processor Statistical Simulation of Forming a Detonation Wave in the Shock Tube for<br>Cases of Different Thresholds of a Reaction .....                       | S. V. Kulikov and O. N. Ternovaia   |
| A Numerical Scheme for the Boltzmann Equation .....  | H. Babovsky   |
| Numerical Study of Transverse Supersonic Flow of Monatomic and Diatomic Gases Past a<br>Plate .....  | V. A. Titarev, E. M. Shakhov, V. A. Rykov and V. G. Soudakov  |
| On the Existence of the Negative Mass Flows in Evaporation and Condensation Problems –<br>Effects of the Finite Thermal Conductivities of the Condensed Phases ..... | Y. O. Onishi  |
| Numerical Investigation on Models of the Boltzmann Equation for Gas Mixtures .....   | S. Kosuge, H. Mizuno and K. Aoki  |
| The Tang-Toennies Potentials for the Boltzmann Collision Integrals .....   | V. V. Aristov and A. A. Frolova   |
| Divergent And Stochastic Combined Forms Of The Boltzmann's Collision Integral In<br>Numerical Simulation .....   | V. L. Saveliev and S. A. Filko  |
| Numerical Modeling of the Unsteady Vapor Outflow from a Flat Surface Using Direct<br>Numerical Solution of the Boltzmann Equation .....                              | O. I. Rovenskaya and I. V. Voronich   |
| A Method of Joint Solution of the Boltzmann and Navier-Stokes Equations with Application<br>to the Problems of Gas Flows over Plane Plates .....                     | S. P. Popov and F. G. Tcheremissine   |
| Computation of Decaying Isotropic Compressible Turbulence .....  | M. Tsukamoto and A. Sakurai   |
| Solving of the Boltzmann Equation in Some Problems with Moving Interface Surface .....   | A. P. Kryukov and A. K. Yastrebov   |
| Heat Transfer in a Gas Mixture .....   | A. A. Raines  |
| Parallel Implementation of the Unified Flow Solver .....   | S. A. Zabelok, V. V. Aristov, A. A. Frolova, V. I. Kolobov and R. R. Arslanbekov                      |

## CHAPTER 4

### DSMC AND RELATED SIMULATIONS

|   |                                     |
|---|-------------------------------------|
| Time Relaxed Monte Carlo Methods for the Boltzmann Equation: an Overview .....    | G. Russo ( <i>Invited</i> )         |
| Sophisticated Versus Simple DSMC .....  | G. A. Bird                          |
| Parallel Hybrid Method for Subsonic Flows .....                                   | C. R. Kaplan, J. Liu and E. S. Oran |
| Detecting Equilibrium Cells in DSMC to Improve the Computational Efficiency ..... |                                     |

|  |  |
|--|--|
| M. N. Macrossan and X. Geng  |  |
| Applying the Macroscopic Chemistry Method to Dissociating Oxygen .....   |  |
| C. R. Lilley and M. N. Macrossan   |  |
| Streamline Extrapolation Technique for Subsonic Outflow Boundary Conditions in DSMC Simulations .....                  |  |
| Ö. H. Turgut and M. C. Çelenligil  |  |
| New Model for Statistical Simulation of High-Temperature Nonequilibrium Dissociation .....                             |  |
| Ye. A. Bondar and M. S. Ivanov   |  |
| Reconsideration of the Majorant Collisional Frequency Schemes for the DSMC Method .....                                |  |
| M. S. Ivanov, S. V. Rogasinsky, A. A. Shevyrin and Ye. A. Bondar   |  |
| Statistical Errors of DSMC Results for Rarefied Gas Flows .....  |  |
| S. V. Rogasinsky, D. A. Levin and M. S. Ivanov   |  |
| Use of Independent Ensemble Averaging for DSMC Solutions in Unsteady Flow .....  |  |
| D. Auld  |  |
| DSMC Estimate of the Ionic Wind Effect on a Supersonic Low-Density Flow .....  |  |
| E. Menier, J. C. Lengrand and V. Lago  |  |
| On the Stability of the Vertically Stratified State of a Vapor–Gas Mixture between Two Parallel Condensed Phases ..... |  |
| S. Takata, T. Shimada and H. Mizuno  |  |
| DSMC Simulations of Shock Interaction with Shock-Scale Harmonic Fluctuations .....                                     |  |
| K. Gu, C. Watkins, K. Kossi and Y. Andreopoulos  |  |
| Progresses in Monte Carlo Simulation of Light Scattering Spectra in Atomic Gases .....                                 |  |
| D. Bruno and S. Longo  |  |
| Numerical Determination of Reaction Coefficient of Nitrogen Atoms with Solid Carbon by Using DSMC Method .....         |  |
| S. Yonemura, K. Nanbu, C. Park and H. Takekida   |  |
| Numerical Analysis of the Cylindrical Couette Flow of a Vapor-Gas Mixture .....  |  |
| H. Yoshida and K. Aoki   |  |
| Simulations of Reactor Efficiency for Pulsed Pressure Chemical Vapor Deposition (PP-CVD) .....                         |  |
| H. M. Cave, S. P. Krumdieck and M. C. Jermy  |  |
| DSMC Simulation of Pressure-Driven Flows and Heat Transfer in Microfilters .....                                       |  |
| D. Ameer, C. Croizet, F. Maroteaux and R. Gatignol   |  |
| Statistical Modeling of Interactions between Gas Molecules and Pulsed Optical Lattices .....                           |  |
| C. Ngalande, S. Gimelshein and M. Shneider   |  |
| Object-Oriented Software Design for the Three-Dimensional Direct Simulation Monte Carlo Method .....                   |  |
| A. V. Kashkovsky, P. V. Vashchenkov and M. S. Ivanov   |  |
| On Evolution of Vortical System in Rarefied Gas Flow .....   |  |
| Yu. I. Khlopkov, I. V. Voronich, O. I. Rovenskaya and Y.-I. Choi   |  |
| A New Decoupled Rotational Energy Exchange Scheme for DSMC Calculations .....  |  |
| C. R. Lilley and M. N. Macrossan   |  |
| Rotational Collision Number and Rotationally Inelastic Cross-Section in Monte Carlo Simulations .....                  |  |
| H. Matsumoto   |  |
| A DSMC Method for the Landau-Fokker-Planck Equation .....  |  |
| A. V. Bobylev, E. Mossberg and I. F. Potapenko   |  |
| Construction of Optimal Parameters for the Test Particle Monte Carlo Method .....                                      |  |
| M. Plotnikov and E. Shkarupa   |  |
| Application of Parametric Correction for Improving of DSMC Method Results .....  |  |
| S. V. Rogasinsky and M. S. Ivanov  |  |
| Simulation of Rarefied Gas Flows by Improved TRMC Method .....   |  |
| G. Russo, M. Ivanov and A. Shevyrin  |  |

|   |  |
|---|--|
| Time Relaxed Monte Carlo Methods Based on Sampling from McKean Graphs .....   | G. Russo and A. Shevyrin   |
| DSMC Computations of a Rarefied Gas Interacting with Light .....  | M. Ivanov and A. Shevyrin  |
| DSMC Method as Applied to Investigation of Slip Flow of Plasma-Rise Gas in Hollow Cathode .....                       | B. I. Yudin and I. B. Yudin  |
| Quantifying the Effects of Rarefaction in High Velocity, Slip-Flow Regime .....                                       | G. Zuppari, D. Paterna and A. Rega   |
| Interpretation of Impact and Static Pressure Measurements in Non-Equilibrium Supersonic Flow by the DSMC Method ..... | R. V. Maltsev, A. A. Morozov and A. K. Rebrov  |
| Efficient Parallelization of the DSMC Method .....  | P. V. Vashchenkov, A. V. Kashkovsky and M. S. Ivanov   |
| SMILE System for 2D/3D DSMC Computations .....  | M. S. Ivanov, A. V. Kashkovsky, S. F. Gimelshein, G. N. Markelov, A. A. Alexeenko, Ye. A. Bondar, G. A. Zhukova, S. B. Nikiforov and P. V. Vashchenkov |

## CHAPTER 5 EXPERIMENTAL PROCEDURES IN RGD

|  |  |
|--|--|
| Photonic Analyses of High Knudsen Number Flows .....   | T. Niimi ( <i>Invited</i> )  |
| Experimental Studies On Impingement Pressure .....   | S. P. Sathian and J. Kurian  |
| On-Orbit Experiments On Pressure Change Research In Ambient Space Vehicle Environment                                      | A. N. Krylov and L. V. Mishina   |
| Mass Flow Rate and Tangential Momentum Accommodation Coefficient from Experiments in a Single Micro Tube .....             | T. Ewart, P. Perrier, I. A. Graur and J. G. Méolans                              |
| On-Orbit Quartz Crystal Microbalance Measurements of Molecular Deposition on Russian and U.S. Space Stations .....         | V. K. Dushin, A. N. Krylov and C. E. Soares                                      |
| Development of Pressure Sensitive Molecular Film as a Measurement Technique for High Knudsen Number Conditions .....       | Y. Matsuda, H. Mori, T. Niimi and H. Uenishi                                     |
| Discharge Coefficients and On-Axis Flow Properties in Small Sonic Orifices at Low Reynolds Numbers .....                   | G. Koppenwallner, T. Lips and C. Dankert   |
| Zinc Deposition Experiments for Validation of DSMC Calculations of Internal Flows .....                                    | R. Dorsman, J. F. M. Velthuis, A. M. B. van Mol and C. R. Kleijn                 |
| Modeling of Processes of External Contamination of International Space Station by Jets of Orientation Thrusters .....      | Yu. I. Gerasimov, A. N. Krylov, V. G. Prikhodko, I. V. Yarygin and V. N. Yarygin |
| Modification of a Rarefied Supersonic Flow over a Flat Plate Using an Electrical Discharge ...                             | E. Menier, E. Depussay, L. Leger, V. Lago and J. C. Lengrand                     |
| Structure and Gas Parameters of Plume Expiring in Vacuum from Four Nozzles, Located Around of the Space Vehicle Case ..... | Yu. I. Gerasimov, A. N. Krylov and V. N. Yarygin                                 |

## CHAPTER 6 CLUSTERS AND AEROSOLS

|   |  |
|---|--|
| Kinetic Multiscale Modeling and Simulation of Cluster Formation Processes in Free Gas Expansions Using DSMC ..... | D. A. Levin and J. Zhong ( <i>Invited</i> )  |
| Condensation and Temperature Forces Between Aerosol Particles .....   | A. Erofeev, O. Friedlander, M. Kogan and V. Alexandrov                             |
| Quasi-Chemical Cluster Model Approach To Gas Precondensation Stage .....  | A. S. Artyukhin, B. V. Egorov, Yu. E. Markachev, E. A. Plekhanov and I. A. Ozarnov |
| On the Motion of Nonsymmetrical Particles with Nonuniform Active Surface in Rarefied Gas .....                    | J. G. Batisheva  |
| The Direct Simulation Monte Carlo Of Cluster Formation Processes In Laser Plume .....                             | N. Y. Bykov and G. A. Lukyanov   |

## CHAPTER 7 GAS-SURFACE INTERACTION

|   |   |
|---|---|
| Gas Jet Deposition of Teflon-Like Films and Ultra-Dispersed Particles .....   | S. Iannotta, T. Toccoli, L. Aversa, R. Verucchi, V. Micheli, M. Anderle, R. V. Maltsev, A. K. Rebrov and A. I. Safonov ( <i>Invited</i> ) |
| Surface Structure Degradation of Si-Based Materials Exposed to Dissociated Air and Nitrogen Flows .....               | O. Gerasimova, A. Kolesnikov, S. Borisov and A. Gordeev   |
| Theoretical Dynamics Study of Atomic Oxygen over $\beta$ -Cristobalite (100) .....                                    | C. Arasa, H. F. Busnengo, A. Salin and R. Sayós   |
| Measurements of Thermal Accommodation Coefficients .....  | W. M. Trott, D. J. Rader, J. R. Torczynski, J. N. Castañeda, M. A. Gallis and L. A. Gochberg  |
| Experimental Research of Reflected Flux at Interaction of High-Velocity Free Molecular Beam with Solid Surfaces ..... | A. I. Erofeev, A. P. Nikiforov and O. G. Friedlander  |
| Molecular Dynamics Study of Xe-Graphite (0001) Surface Scattering .....   | H. Yamaguchi, Y. Watanabe, K. Shobatake, S. Maruyama and Y. Matsumoto   |
| Monte Carlo Simulation of Heterogeneous Catalytic Processes on Heat Shield Coatings of Space Vehicles .....           | V. L. Kovalev, V. Ju. Sazonova and A. N. Jakunchikov  |
| Surface Roughness Effects in Low Reynolds Number Channel Flows .....  | N. Gimelshein, J. Duncan, T. Lilly, S. Gimelshein, A. Ketsdever and I. Wysong   |
| Wall Temperature Jump in Polyatomic Gas Flows .....   | J. G. Méolans and S. K. Dadzie  |
| Rarefied Gas Atoms Reflection on Rough Surfaces .....   | M. V. Anolik  |
| Plasma Surface Interaction: Thin Film Formation .....   | A. L. Bondareva, G. I. Zmievskaya and A. V. Ivanov  |
| Quasiclassical Approximation for Rotational and Vibrational Transition Probabilities in Gas-Surface Scattering .....  | Yu. E. Gorbachev  |
| Investigation of Heterogeneous Atoms Recombination by Molecular Dynamics Method .....                                 | V. L. Kovalev and M. Ju. Pogosbekian  |
| Application of Nocilla Model for Plume Impingement Analysis .....   | G. N. Markelov  |

The Normal Momentum Accommodation Effect on Thin Plate Oscillations in a Rarefied Gas .  
A. P. Polikarpov, P. J. Polikarpov and S. F. Borisov

## CHAPTER 8 SPACE VEHICLES AERODYNAMICS

|  |  |
|--|--|
| Measurements for Validating DSMC and Navier Stokes Computations of Chemically Reacting Hypervelocity Flows .....   | J. K. Harvey, M. S. Holden and G. V. Candler                     |
| Blunt Body Aerodynamics for Hypersonic Low Density Flows .....   | J. N. Moss, C. E. Glass and F. A. Greene                         |
| Scaling Parameters for Hypersonic Flow: Correlation of Sphere Drag Data .....                                      | M. N. Macrossan  |
| Numerical Study of Hypersonic Rarefied Gas Flows About a Toroidal Ballute .....                                    | V. V. Riabov   |
| Numerical Modelling of the Magnus Force and the Aerodynamic Torque on a Spinning Sphere in Transitional Flow ..... | A. N. Volkov   |
| Numerical Simulation of Rarefied Gas Flows about a Rotating Cylinder .....   | V. V. Riabov   |
| Cassini-Huygens Aerodynamics with Comparison to Flight .....   | D. S. Liechty  |
| Application of Modified DSMC Algorithm to Inviscid Flow Calculation .....  | Y. I. Choi and S. L. Gorelov                                     |
| High-Altitude Aerodynamics of the Clipper Spacecraft .....   | P. V. Vashchenkov, M. S. Ivanov, A. N. Krylov and A. V. Khokhlov |

## CHAPTER 9 INTERNAL FLOWS, JETS, AND PLUMES

|   |   |
|---|---|
| Problems of Gas-Dynamical and Contaminating Effect of Exhaust Plumes of Orientation Thrusters on Space Vehicles and Space Stations .....                              | Y. I. Gerasimov and V. N. Yarygin ( <i>Invited</i> )                              |
| Instability of the Plane Poiseuille Flow for Longitudinal Vortical Disturbances by the Ghost Effect of Infinitesimal Curvature .....                                  | Y. Sone and T. Doi  |
| On the Taylor-Couette Problem in the Continuum Limit .....  | A. Manela and I. Frankel  |
| Effect of Vibrational Energy on Dynamics of Pulsed Vapor Cloud Expansion .....  | A. A. Morozov   |
| Hybrid Navier-Stokes/DSMC Gas Flow Simulations in Very Low Pressure Thin Film Deposition .....  | G. Abbate, B. J. Thijsse and C. R. Kleijn   |
| Simple Rarefied Gas Flows in Porous Regions .....   | L.M. de Socio and L. Marino   |
| Effect of Carrier Gas Nature on Collision-Induced Dissociation of Large Molecular Ions in Mass-Selective Detector with Atmospheric Pressure Chemical Ionization ..... | A. S. Kudryavtsev, A. L. Makas, A. K. Rebrov, P. A. Skovorodko and M. L. Troshkov |
| Experimental Studies On Heat Transfer To Bodies In Hypersonic Rarefied Gas Flows .....  | S. P. Sathian and J. Kurian   |

|   |   |
|---|---|
| Transient Plume Impingement Analysis For Formation Flying Spacecraft .....                              | M. Woronowicz   |
| Simulation of Nozzle Plume Droplet Flow in Transitional Regime .....                                    | Yu. P. Golovachov, M. S. Ivanov, D. V. Khotyanovskiy, A. N. Kudryavtsev, E. Yu. Kumzerova and A. A. Schmidt |
| Modeling of Gaseous Expansion in Free Jet and Microchannel Flows Using the Modified Moment Method ..... | R. S. Myong, J. H. Seo, S. E. Je and T. H. Cho  |
| Self-Similar Interpolation in Rarefied Gas Dynamics .....   | S. Gorelov  |
| Low Density Jet Impingement - Measurement of Heat Transfer .....  | S. P. Sathian and J. Kurian   |
| Modelling of Pulsed Laser Ablation of a Solid Target in a Vacuum in the Explosive Boiling Model .....   | G. A. Lukyanov and O. I. Vakulova   |
| Light-Induced Heat and Mass Transfer of Rarefied Gas in a Capillary .....                               | I. V. Chermnyaninov, V. G. Chernyak and E. A. Vilisova  |
| Peculiarities of Gas Ejection Into Vacuum From a Nozzle with Near-Wall Liquid Film .....                | V. G. Prikhodko, S. F. Chekmarev, I. V. Yarygin and V. N. Yarygin   |
| Viscosity Effects on Prandtl–Meyer Expansion .....  | D. V. Khotyanovsky, P. V. Vashchenkov, A. N. Kudryavtsev and M. S. Ivanov                                   |

## CHAPTER 10 REACTION AND RELAXATION PROCESSES

|   |  |
|---|--|
| Radiation Heat Transfer Models for Re-Entry Aerothermodynamics .....  | P. Omaly, O. Rouzaud and S. Surzhikov                |
| State-Specific Vibrational Relaxation and Thermal Dissociation in Nonequilibrium Hypersonic Flows .....     | E. Josyula and W. F. Bailey                          |
| O+HCl Cross Sections and Reaction Probabilities in DSMC .....   | T. Ozawa, I. J. Wysong and D. A. Levin               |
| A Molecular Kinetic Model of Reacting Gas Flows .....   | A. Sakurai, M. Tsukamoto and H. Honma                |
| Advanced Models of Vibration-Dissociation Kinetics in Mixtures Containing CO <sub>2</sub> .....             | E. V. Kustova, E. A. Nagnibeda and A. Chikhaoui      |
| The Effect of the Affinity on the Equilibrium Behavior of a Reactive System .....                           | G. M. Kremer, M. P. Bianchi and A. J. Soares         |
| Multiscale Analysis for Atomic Oxygen Recombination on Silica Surface .....                                 | S. Shiozaki, Y. Sakiyama, S. Takagi and Y. Matsumoto |
| Stochastic Models of Hot Planetary Coronae .....  | V. I. Shematovich                                    |
| Multi-Temperature Kinetics and Thermodynamic Properties Behind Shock Waves in Reacting Air Components ..... | K. I. Karakulko and E. A. Nagnibeda                  |
| Multi-Temperature Kinetics and Transport Properties in CO <sub>2</sub> /N <sub>2</sub> Mixtures .....       | E. V. Kustova and L. A. Puzyreva                     |
| On a Role of Multi-Level Energy Transitions in the State-to-State Vibrational-Chemical Kinetics .....       | E. A. Nagnibeda and K. A. Novikov                    |
| A Strong Shock Wave Structure in Low Density Gas Mixture Flow Past a Cylinder .....                         | M. Yu. Plotnikov and A. K. Rebrov                    |

|   |  |
|---|--|
| On the Influence of Vibrational Distributions on Dissociation Rates ..... | E. A. Nagnibeda, K. A. Sinitsyn and S. S. Bazilevich |
|---|--|

## CHAPTER 11 PLASMA FLOWS AND PROCESSING

|  |   |
|--|---|
| Modeling of Multi-Time Scale Particles in Rarefied Gas and Plasma .....  | K. Nanbu and T. Furubayashi ( <i>Invited</i> )  |
| Time-Dependent Processes in Diodes with Rarefied Plasma .....  | A. Ya. Ender and V. I. Kuznetsov  |
| “Anomalous” Shock Structure In Weakly Ionized Gas Under Strong Thermal Nonequilibrium .....                              | A. F. Kolesnikov  |
| Non-Linear Gyrokinetic Theory of Magnetoplasmas .....  | M. Tessarotto, C. Cremaschini, P. Nicolini and A. Beklemishev   |
| Electron-Beam Activation of Rarefied Gases .....   | G. I. Sukhinin and A. V. Fedoseev   |
| Distribution Function and Transport Properties of the Ions Moving in a Neutral Gas under External Electric Field .....   | A. Ya. Ender and I. A. Ender  |
| Low Pressure Deposition in a High Density Plasma CVD Reactor .....   | L. A. Gochberg and R. L. Kinder   |
| Simulation of Low Pressure Plasma Processing Reactors: Kinetics of Electrons and Neutrals ..                             | R. R. Arslanbekov and V. I. Kolobov   |
| Laser Deflection Diagnostics Of Shock Wave Interacting with Ar and N <sub>2</sub> DC Discharge .....                     | G. Cicala, A. Russo, M. Capitelli, O. de Pascale, S. Longo, D. Bruno, P. Minelli, A. Boggia, A. C. Rainò and V. Nassisi |
| Superabundant-Variable Approach to Gyrokinetic Theory .....  | P. Nicolini and M. Tessarotto   |
| Gas – Surface Interaction in Hollow Cathode Glow Discharge .....   | P. J. Polikarpov, A. P. Polikarpov, S. F. Borisov, S. P. Nikulin, P. V. Tretnikov and D. V. Zubritsky                   |
| Nonlinear Debye Screening in Strongly-Coupled Plasmas .....  | D. Sarmah, M. Tessarotto and M. Salimullah  |
| Direct Simulation Monte Carlo Study of Neutral Temperature, Density, and Pressure in an Inductively Coupled Plasma ..... | M. Shimada, R. Cattolica and G. R. Tynan  |
| The Role of Secondary Electrons and Metastable Atoms in Electron-Beam Activation of Argon-Silane Mixtures .....          | G. I. Sukhinin, A. V. Fedoseev and S. Ya. Khmel   |

## CHAPTER 12 MICRO/NANO SCALE FLOWS AND DEVICES

|   |   |
|---|---|
| Numerical Simulation of a Knudsen Pump Using the Effect of Curvature of the Channel .....         | K. Aoki, P. Degond, L. Mieussens, M. Nishioka and S. Takata ( <i>Invited</i> )  |
| Low Speed Nano/Micro/Meso-Scale Rarefied Flows Driven by Temperature and Pressure Gradients ..... | E. P. Muntz, A. A. Alexeenko, S. F. Gimelshein, A. D. Ketsdever, Y.-L. Han, M. P. Young, J. H. Park, C. Ngalande, N. P. Selden and R. H. Lee ( <i>Invited</i> ) |
| Generalized Reynolds Equation Based on the Ellipsoidal Statistical Model .....                    | C. Cercignani, M. Lampis and S. Lorenzani   |

|  |  |
|--|--|
| Numerical Error Analysis for Deterministic Kinetic Solutions of Low-Speed Flows .....  | A. A. Alexeenko  |
| Thermal Creep Continuum Modeling .....   | J. G. Méolans, I. A. Graur and D. E. Zeitoun                                     |
| Thermal Creep of a Slightly Rarefied Gas through a Channel with Curved Boundary .....  | C. J. T. Laneryd, K. Aoki, P. Degond and L. Mieussens                            |
| On the Dependence of Rarefied Gas Flow Stability in Channels on Interaction Parameters .....   | O. A. Aksenova and I. A. Khalidov  |
| Drag of Nano-Particles in the Transitional Flow Regime .....   | G. Karr and M. Owen  |
| Simulations of Low Speed Flows with Unified Flow Solver .....  | V. V. Aristov, A. A. Frolova, S. A. Zabelok, V. I. Kolobov and R. R. Arslanbekov |
| Monte Carlo Simulation of Rotation of a Laser Opto-Microactuator .....   | M. Ota, Y. He, and S. K. Stefanov  |
| Gas Flow around a Longitudinally Oscillating Plate at Arbitrary Ratio of Collision Frequency to Oscillation Frequency .....                          | F. Sharipov and D. Kalempa   |
| The Critical Accommodation Coefficient for Velocity Inversion in Rarefied Cylindrical Couette Flow in the Slip and Near Free-Molecular Regimes ..... | S. K. Stefanov, R. W. Barber, D. R. Emerson and J. M. Reese                      |
| Gas Mixture Separation in Nanosize Capillaries. Effects of Surface Forces .....  | V. I. Roldughin and V. M. Zhdanov  |
| Gas Separation Effect of the Pump Driven by the Thermal Edge Flow .....  | H. Sugimoto, S. Takata and S. Kosuge   |
| Knudsen Effect and a Unified Formula for Mass Flow-Rate in Microchannels .....   | T. G. Elizarova  |
| Parallel DSMC Application for the Analysis of Argon Gas Flow in a T-Shaped Micro Manifold.....   | N. Sengil and F. O. Edis   |
| Evaporation-Condensation Problem in Vapour-Gas Mixtures .....  | A. P. Kryukov, V. Yu. Levashov and I. N. Shishkova                               |
| Two-Dimensional Slip-Velocity Gaseous Flow Past a Confined Square in a Microchannel .....  | K. S. Shterev and S. K. Stefanov   |

## CHAPTER 13 RGD IN ASTROPHISICS AND AERONOMY

|   |  |
|---|--|
| Free Molecular Simulations of Vapor Dynamics Following a Lunar Impact .....                                     | D. B. Goldstein, S. A. Stern, D. H. Crider, G. R. Gladstone, D. D. Durda, E. Asphaug, B. Larignon, P. L. Varghese and L. M. Trafton  |
| Plasma Kinetics Issues in the ESA 'Plasma Laboratory in Space' Study .....                                      | B. Annaratone, A. Biancalani, D. Bruno, M. Capitelli, F. Ceccherini, E. Daly, O. de Pascale, A. Hilgers, K. Lackner, S. Longo, S. Marcuccio, T. Mendonca, V. Nagnibeda, F. Pegoraro and J. Sanmartin |
| 3D Numerical Modelling of a Rarefied Gas Flow in the Nearby Atmosphere around a Rotating Cometary Nucleus ..... | A. N. Volkov and G. A. Lukyanov  |

## CHAPTER 14 MOLECULAR DYNAMICS SIMULATIONS

|  |                       |
|--|-----------------------|
| Why Does Expansion Shock Wave Not Exist in Nature? ..... | N. Komatsu and T. Abe |
|--|-----------------------|

|   |   |
|---|---|
| The Molecular Dynamics Calculation of the Self-Diffusion Coefficient .....                              | V. Ya. Rudyak, A. A. Belkin, V. V. Egorov and D. A. Ivanov                                |
| Hybrid Molecular Dynamics-Monte Carlo Method for Heat and Flow Analysis in<br>Micro/Nano-Channels ..... | S. V. Nedeia, A. J. Markvoort, A. J. H. Frijns, A. A. van Steenhoven and P. A. J. Hilbers |
| Molecular Dynamics Simulation of Evaporation of a Two-Component Liquid .....                            | R. Meland and T. Ytrehus  |

## CHAPTER 15 VACUUM GAS DYNAMICS

|  |  |
|--|--|
| The Integro-Moment Method Applied to Two-Dimensional Rarefied Gas Flows .....              | S. Varoutis, D. Valougeorgis and F. Sharipov   |
| First Tritium Pumping Results by a Cryopump with a Precondensed Argon Layer .....          | F. Eichelhardt, B. Bornschein, L. Bornschein, O. Kazachenko, N. Kernert and M. Sturm |
| Analysis of Free Molecular Flow in a 3-D Turbo Molecular Pump with Non-Parallel Blades ... | S. M. Taghavi, M. Shams, M. M. Naeenian and R. Ebrahimi                              |
| Silicon Wafer Cooling by Low Pressure Helium Gas in Vacuum Environment .....               | S. Udagawa, S. Takahashi, D. Nakamura and K. Maeno                                   |

## CHAPTER 16 "MOLECULAR BEAMS AND MOLECULAR COLLISIONS" (Special Session)

|  |  |
|--|--|
| A Quasi Quantum Treatment of Inelastic Molecular Collisions .....  | A. Ballast, A. Gijsbertsen, H. Linnartz, C. A. Taatjes and S. Stolte ( <i>Invited</i> )  |
| Neutral Molecular Beam Formation or Deceleration Induced by Optical Lattices .....   | M. N. Shneider ( <i>Invited</i> )  |
| Laser Sustained Plasma Free Jet for the Generation of Fast Atom Beam of Interest in the<br>Simulation of Low Earth Orbit Environment ..... | K. Amic, J. D. Parisse, A. Lebéhot and R. Campargue ( <i>Invited</i> )   |
| A Helium Cluster Beam Source for Cluster Isolated Chemical Reaction Studies .....  | M. A. Gaveau and P. R. Fournier ( <i>Invited</i> )   |
| Gas Dynamics of the Linear Plasma Generator Magnum-PSI .....   | H. J. N. van Eck, W. J. Goedheer, W. R. Koppers, G. J. van Rooij, B. de Groot, P. H. M. Smeets,<br>D. C. Schram, R. A. H. Engeln, N. J. L. Cardozo and A. W. Kleyn |
| Expansion Characteristics and Invasion in Hot Rarefied Expanding Plasma Flows .....  | O. Gabriel, P. Colsters, R. Engeln and D. C. Schram  |
| Development of Shock Heated Molecular Beam: Modification of Shock Tube Valve .....   | S. Nagata, S. Shiozaki, I. Kinefuchi, Y. Sakiyama and Y. Matsumoto   |
| A Mass and Time-of-Flight Spectroscopy Study of the Formation of Clusters in Free-Jet<br>Expansions of Normal-D <sub>2</sub> .....         | Y. Ekinici, E. L. Knuth and J. P. Toennies   |
| Asymptotical Analysis of Translational Nonequilibrium in the Hypersonic Flow Near the Flat<br>Plate with the Sharp Leading Edge .....      | M. M. Kuznetsov, I. I. Lipatov and V. S. Nicol'sky   |
| Molecular Beam Study on Oxidation of Si(100) Surface with Ozone .....  | I. Kinefuchi, H. Yamaguchi, Y. Sakiyama and Y. Matsumoto   |
| How Does a Particle Move in Chemical Kinetics? .....   | V. V. Vedenyapin   |

## APPENDIX ON CD-ROM ONLY

Analytical Solutions of Continuum Equations in Hypersonic Transitional Flow Over Blunt Bodies

I. G. Brykina, B. V. Rogov and G. A. Tirskiy

Numerical Modeling of Gaseous Expansion from Micro and Nano Nozzles

R. E. Chamberlin and N. A. Gatsonis

Drag and Heat Transfer Coefficients in Free Molecular Flows

S. K. Dadzie, J. G. Méolans and J. M. Reese

Stability of Rarefied Gas Flow in a Channel for Ray-Diffuse Scattering Function

I. A. Khalidov and E. A. Shalaginov

A Study on the Pumping Performance of a Molecular Drag Pump in the Rarefied Gas Flow

M.-K. Kwon and Y.-K. Hwang

Simulation of an Evaporation of a Monatomic Condensed Phase into a Vacuum by a Monte Carlo Method

L.V. Pletnev

Influence of the Dispersion on the Boltzmann Equation for Nonhomogeneous Case

E. V. Prozorova

Fluid Dynamics at Arbitrary Knudsen on a Base of Alexeev-Boltzmann Equation: Sound in a Rarefied Gas

S. B. Leble and M. A. Solovchuk

Boltzmann Kinetics and Mathematical Modeling in Nanotechnology

V. V. Vedenyapin and J. G. Batisheva
