ME49601-27889 · 3 Credits · New in Spring 2027

Open to West Lafayette and Indianapolis Students

Computational Fluid Dynamics for Engineering Analysis and Design

Prerequisite: ME 30800 or equivalent, or permission of instructor
Class time: Tuesday and Thursday 9:00-10:15am
Instructor: Prof. Whitney Yu

CFD skills that launch engineering careers

Learn CFD the way industry uses it — applied modeling, validation, and design decisions.

Real projects	Hemodynamics, Automobiles, aerodynamics, turbomachinery — capped by a semester project
Industry tools	Hands-on CONVERGE CFD with strong technical support from Convergent Science
Engineering Skills	Mesh studies, verification & validation, turbulence modeling, AI-assisted analysis
