

# There's Another Choice.

## Research Opportunities for National Security

Are you looking for that next step after finishing your degree? Do you want to tackle some of the most compelling problems in science and technology? Hungry for work that can have a high-level impact in the world?

At MIT Lincoln Laboratory, we conduct fundamental and applied research to solve some of the most challenging problems facing the nation today. We're looking for the best and brightest to join our elite team.

We believe that we can make the world safer by giving decision-makers the ability to detect, understand, and defend against technological threats like hypersonic missiles, biological weapons, and cyberattacks (to name a few).

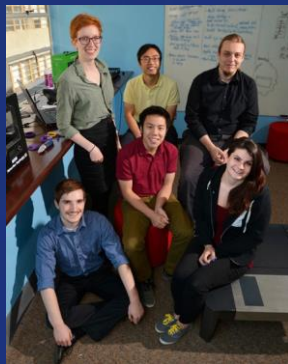

But we also know that to keep the world safe, we might need to develop next-generation capabilities in fields that are still in their infancy, like quantum computing and bioengineering.

Everyone here plays a crucial part in discovering new solutions to critical problems. At MIT Lincoln Laboratory we are motivated to innovate, to take risks, and to give you an opportunity to change the world.

We're located in Lexington, MA, where the air is clean and bike trails come close to our door. We pay well and offer amazing benefits. *Due to the nature of our work, U.S. citizenship is required for all of our openings.*

Scan the QR code to submit your resume, or visit [careers.ll.mit.edu/](https://careers.ll.mit.edu/) to learn more about our current openings.

**Thursday, October 3<sup>rd</sup> from 6:00 – 7:00 p.m. in ARMS 1103**
