

The USDA, Agricultural Research Service, Poultry Production and Product Safety Research Unit in Fayetteville, Arkansas, is seeking a POSTDOCTORAL RESEARCH ASSOCIATE for a TWO YEAR APPOINTMENT. Ph.D. within the past four years is required. The position is a GS 11; salary is commensurate with experience, starting at \$72,553, plus benefits. Citizenship restrictions apply. The incumbent will help develop and test an indoor air scrubber for removing ammonia, dust and pathogens from air inside animal rearing facilities and will assist in measuring ammonia and greenhouse gas concentrations and emissions from animal rearing facilities and fields fertilized with animal manure. Candidates should have a Ph.D. in Agricultural Engineering, Agronomy, Animal Science, Environmental Science, Poultry Science, Soil Science or a closely related field. Send letter of interest, references, and CV to Dr. Philip Moore, USDA/ARS, Plant Sciences Room 115, University of Arkansas, Fayetteville, AR, 72701 or e-mail (Philip.moore@usda.gov). USDA/ARS is an equal opportunity provider and employer.
