Agricor, Inc. Marion, IN
Supplier of Corn Grits, Meal and Flour to the Food Industry

Positions Available

Engineering – Full-Time
Engineering – Summer Internship

Agricor is currently seeking an Engineering Technologist to assist the Project Manager with activities related to project management, design, engineering, process, automation, construction, and operational functions.

The position is responsible for the practical application and implementation of designs ranging from major capital expenditures to individual process initiatives. You will apply mechanical and electrical engineering principles and technological skills to contribute to the success and advancements in a corn dry milling operation.

- Equipment Layout
- Process Design
- AutoCAD/Drafting
- PLC Programming
- HMI Development
- Construction Management

We are proud millers of Certified Organic, Non-GMO and conventional dry-milled corn products that we sell to food, industrial, companion animal and feed customers worldwide.
