Early careers at AstraZeneca: Global Graduate Program

Locations: Mount Vernon (Indiana), Wilmington (Delaware), Newark (Delaware)
Salary: $75,000 plus excellent benefits

Kickstart your career and help bring life-changing medicines to patients around the world.
Starting in September 2023, the Operations Graduate Programme begins with three individual eight-month placements. Each placement will provide you with extraordinary insights into our business, and the chance to influence our future direction. If successful during the first 2 years, you will then consolidate your learning and experience in your third year in the programme. Combining a high level of on-the-job experience and coaching, you’ll have a huge network of support to get you where you want to go. Creating connections and building long-lasting relationships in a highly collaborative, fun, and fast-paced environment.

Essential Requirements
• A bachelor’s or master’s degree (any subject area) awarded in 2022, or due to be awarded in 2023
• A passion to work in Operations, Pharmaceuticals and Healthcare, particularly with a real desire to take on real responsibilities in manufacturing and across the functions that support our supply chain activities
• A valid passport
• Global and regional flexibility to rotate through our business at the locations that offer you the best developmental experiences.
• Fluent in English
