The Indiana Department of Environmental Management (IDEM) is seeking to fill an open position in its Office of Water Quality!

**Environmental Manager**

This position will be located at the Shadeland office location at 2525 N Shadeland Ave. in Indianapolis, IN. The Environmental Manager 2 position provides geographic information system (GIS) and data analysis support for the branch with occasional field duties described in IDEM's Water Quality Monitoring Strategy.

The position supports critical services to the branch such as global positioning system (GPS) unit oversight, map review and map creation, oversight assistance of online spatial tools/applications, and database support to the nonpoint source (NPS) and branch wide programs.
The position is also responsible for completing internal and external data requests and serving as a liaison for GIS services for the branch. The position is responsible for assisting with statistical analysis of environmental monitoring data collected by the branch and provides necessary support for ongoing initiatives.

The position fills an important role by providing technical support on GPS and GIS services across branch wide programs.

Work Location: Indianapolis, Indiana
