The NSLC on Biotechnology is looking for Team Advisors for Summer 2022.

National Student Leadership Conference on Biotechnology
Since 1989, thousands of outstanding high school students have attended the NSLC to explore today's most exciting careers, develop essential leadership skills, and experience life on a college campus. The NSLC on Biotechnology is a 9-day conference providing talented high school students from around the world with a hands-on academic experience, opportunities to meet working professionals, and visits to biotechnology-related facilities. Under the guidance of their Team Advisors, these students will explore various fields in biotechnology, discuss ethical issues impacting the field, and participate in a variety of biotech lab experiences and projects.

The Role of the Team Advisor
Team Advisors (TAs) act as facilitators, presenters, simulation monitors, and resident advisors. The job of a TA encompasses the role of a chaperone, teacher, mentor, and policy enforcer. As a TA, you will facilitate and supervise a group of 12-16 students. Many TAs will also lead activities, simulations, and lectures attended by all students. Working with your TA group is an amazing experience as you watch your students make friends for life and experience the world of biotechnology in a personal way. This is a unique opportunity to serve as a mentor and role model for talented young students and share your passion for and knowledge of topics within the fields associated with biotechnology. Team Advisors arrive on-site 3-4 days before students arrive in order to participate in orientation and training and stay for two 9-day sessions.

Requirements for Employment
Team Advisors must be current college students with a background and interest in some discipline within life sciences or engineering. The core focus of NSLC is on leadership. Candidates should have leadership experience. The NSLC is looking for ATAs with backgrounds in a variety of fields including bioengineering, molecular biology, healthcare, agriculture, and other life sciences. Training days prior to the start of session are mandatory. When applying, please submit a cover letter and resume along with your application.

Dates & Compensation
Team Advisors will be paid $765 at the end of each session. The NSLC pays for room & board, as well as transportation to and from the conference. For more information, visit www.nslcleaders.org/about-summer-youth-programs/summer-job-opportunities/

Applications are now being accepted. In 2022, the NSLC on Biotechnology will be held on the campuses of American University and the University of California, Berkley.
