GCB Bioenergy exists to promote understanding of the interface between biological sciences and the production of fuels directly from plants, algae and waste. All aspects of current and potential biofuel production, from forestry, crop production, enzymatic deconstruction and microbial fuel synthesis to implications for biodiversity, ecosystem services, economics, policy and global change will be included. Studies may be at all levels of organization from gene discovery and enzyme design to crop feedstock genetics and systems analysis of biofuel production operations. They may be experimental, observational or theoretical, and may concern higher plant and algal systems, biological mimicry, enzymes, biotechnology, fuel synthesis, ecosystem services, environmental impacts and/or whole production system analysis. GCB Bioenergy will concentrate on primary research articles, but operate a flexible policy regarding other article types, including Platforms, Technical Papers, Mini-Reviews and Opinion Papers.

**Information for Subscribers.** GCB Bioenergy is published in 6 issues per year and is All newly published articles (submitted from 25 March 2015) will be open access under the Creative Commons Attribution License, which permits use, distribution and reproduction in any medium, provided the original work is properly cited. All articles published by GCB Bioenergy will be fully open access: immediately freely available to read, download and share.

The Creative Commons Attribution License (CC-BY) allows users to copy, distribute and transmit an article, adapt the article and make commercial use of the article. The CC BY license permits commercial and non-commercial re-use of an open access article, as long as the author is properly attributed.

Copyright on any research article published by Global Change Biology Bioenergy is retained by the author(s). Authors grant Wiley a license to publish the article and identify itself as the original publisher. Authors also grant any third party the right to use the article freely as long as its integrity is maintained and its original authors, citation details and publisher are identified. Further information about open access license and copyright can be found at <http://www.wileyopenaccess.com/details/content/12f25db4c87/Copyright-License.html>.

Effective with the 2016 volume, this journal will be published in an online-only format.

**Purchasing Print Reprints.** Print reprints of Wiley Open Access articles can be purchased from [corporatesales@wiley.com](mailto:corporatesales@wiley.com)

**Back Issues.** Single issues from current and prior year volumes are available at the current single issue price from [cs-journals@wiley.com](mailto:cs-journals@wiley.com). Earlier issues may be obtained from Periodicals Service Company, 11 Main Street, Germantown, NY 12526, USA. Tel: + 1 518 537 4700, Fax: + 1 518 537 5899, Email: [psc@periodicals.com](mailto:psc@periodicals.com).

**Despatch.** GCB BIOENERGY, (ISSN 1757-1707), is published bimonthly. US mailing agent: Mercury Airfreight International Inc., 365 Blair Road, Avenel, NJ 07001, USA. Periodicals postage paid at Rahway, NJ.

**Publisher.** GCB Bioenergy is published by John Wiley & sons Ltd, 9600 Garsington Road, Oxford, OX4 2DQ, UK. Tel: + 44 (0) 1865 776 868, Fax: + 44 (0) 1865 714 591.

**Production Editor:** Pavan Raj Nagarajan ([gcb@wiley.com](mailto:gcb@wiley.com))

Wiley's Corporate Citizenship initiative seeks to address the environmental, social, economic, and ethical challenges faced in our business and which are important to our diverse stakeholder groups. Since launching the initiative, we have focused on sharing our content with those in need, enhancing community philanthropy, reducing our carbon impact, creating global guidelines and best practices for paper use, establishing a vendor code of ethics, and engaging our colleagues and other stakeholders in our efforts. Follow our progress at [www.wiley.com/go/citizenship](http://www.wiley.com/go/citizenship).

**Front cover design:** Kyeon Heo, Multimedia Designer, Institute for Genomic Biology. Thumbnail 1, 2 and 3: by Juan Yan, Rachel Brimmer & Thomas H. Deluca, and Indrajeet Chaubey, respectively.

## CONTENTS

### Primary Research Article

- 690 **Environmental implications of the use of agro-industrial residues for biorefineries: application of a deterministic model for indirect land-use changes**  
*Davide Tonini, Lorie Hamelin and Thomas F. Astrup*

### Original Research Articles

- 707 **A spatial assessment of potential biomass for bioenergy in Australia in 2010, and possible expansion by 2030 and 2050**  
*Debbie F. Crawford, Michael H. O'Connor, Tom Jovanovic, Alexander Herr, Robert John Raison, Deborah A. O'Connell and Tim Baynes*
- 723 **Soil fungal and bacterial responses to conversion of open land to short-rotation woody biomass crops**  
*Chao Xue, Christopher Ryan Penton, Bangzhou Zhang, Mengxin Zhao, David E. Rothstein, David J. Mladenoff, Jodi A. Forrester, Qirong Shen and James M. Tiedje*
- 737 **Crassulacean acid metabolism (CAM) offers sustainable bioenergy production and resilience to climate change**  
*Nick A. Owen, Kieran F. Fahy and Howard Griffiths*
- 750 **Nitrogen rate and landscape impacts on life cycle energy use and emissions from switchgrass-derived ethanol**  
*Eric G. Mbonimpa, Sandeep Kumar, Vance N. Owens, Rajesh Chintala, Heidi L. Sieverding and James J. Stone*
- 764 **Genetic variation and bidirectional gene flow in the riparian plant *Miscanthus lutarioriparius*, across its endemic range: implications for adaptive potential**  
*Juan Yan, Mingdong Zhu, Wei Liu, Qin Xu, Caiyun Zhu, Jianqiang Li and Tao Sang*
- 777 **The effect of biochar management on soil and plant community properties in a boreal forest**  
*Michael J. Gundale, Marie-Charlotte Nilsson, Nathalie Pluchon and David A. Wardle*
- 790 **Evaluation of the ECOSSE model for simulating soil organic carbon under *Miscanthus* and short rotation coppice-willow crops in Britain**  
*Marta Dondini, Mark Richards, Mark Pogson, Edward O. Jones, Rebecca L. Rowe, Aidan M. Keith, Niall P. McNamara, Joanne U. Smith and Pete Smith*
- 805 **The priming potential of environmentally weathered pyrogenic carbon during land-use transition to biomass crop production**  
*Gary J. McClean, Will Meredith, Andrew Cross, Kate V. Heal, Gary D. Bending and Saran P. Sohi*
- 818 **Candidate perennial bioenergy grasses have a higher albedo than annual row crops**  
*Jesse N. Miller, Andy Vanloocke, Nuria Gomez-Casanovas and Carl J. Bernacchi*
- 826 **Utilizing biofuels for sustainable development in the panel of 17 developed and developing countries**  
*Ilhan Ozturk*
- 848 **Watershed-scale impacts of bioenergy crops on hydrology and water quality using improved SWAT model**  
*Raj Cibir, Elizabeth Trybula, Indrajeet Chaubey, Sylvie M. Brouder and Jeffrey J. Volenec*
