

Rocker Switch Shown Right:

- Automatic reset for ease of operation
- Controls elevator speed
- Switch was custom installed and wired
- Placed for operator friendly use

Control Switches Shown Left:

- Small toggle switches were mounted on the cap of the joystick
- Wires for these switches were ran through the joystick and under the dashboard panels

Wiring and Relays Shown Right:

- This is the wiring ran through the dashboard panels for the switches
- Also shown are the relays that were wired in
- Relays were used due to the switches only being rated for 6 amps
