

Mounted Switches Shown Left:

- Shown are the switches mounted to the joystick
- We also installed LED indicator lights to be more operator friendly

Fabricated Weight Brackets:

- Shown right are the fabricated weight brackets to be placed on the dump cart
- Since the dump cart will be unevenly weighted when dumping, these brackets were made to balance the dump cart

Dump Cart Shown Left:

- Shown is the dump cart prepped for paint.
- The dump box is actually galvanized metal, therefore we had to use a special primer in order to cover it with paint.
