Conrad Farms / Conrad Excavation Opening Available:
Seeking self motivated individual to work with and lead our team on Field Tile Installation, Excavation, and Farming.

Conrad Farms is looking for a person who wants to be a working lead and as skills develop take on more responsibility. We want to continue to grow the farm and excavation business. The right person will grow with the position and not just follow, but also explore a constant state of continuous improvement in all aspects of our business.

So who are we?
We are a family owned and operated business. After graduation from Purdue in 1997, our farming operation was not large enough to support another family. Dallas Conrad worked off farm as an Operations Manager and an Engineer for 16 years, 13 of which he was farming and working off farm full time. By God’s grace, he was able to full time farm in 2012 but still needed additional income to support his family.

Dallas chose the farm drainage business to utilize my education and off farm experience to provide superior quality at a fair price. It is very rewarding to see the positive change drainage makes in a crop. We are offering an engineered solution for drainage; this sets us apart from the competitors.

On the farm, we are trying to maximize profit per acre through technology and farming practices. Our business model on the farm is focused on improving what we already have, and building long-term relationships for growth.

Competitive Salary and Excellent Benefit Package

Working for small company has a lot of advantages. Come be a part of our Family.
