

I will be at Purdue next week and interested in finding students for summer interns next week.

Fischer Farms near Jasper, IN is interested in hiring 2 summer interns for 2020. We will match the role of the individual to their experience and interest. Fischer Farms operates a 450 cow/calf herd and finishes about 800 head of cattle per year. We sell all of our beef directly to restaurants across Indiana. We crop 250 acres of corn all harvested for silage and then planted into cover crops of ryegrass & clovers. This year we are doing an experiment with 60" corn rows and a companion clover crop. We can be flexible with summer vacations & time off. We also practice rotational grazing on about 500 acres of pasture.

Students interested in beef production or agronomy will get great experience in both areas.
Please send resume to email below.

I will also be at Purdue's campus 2/18 through 2/22 and will set aside times for interviews.

Thanks

Dave
