About Midwests’ Internship Program

Now taking applications for 2019 summer internships
Our goal is to provide a multi-faceted and meaningful opportunity for the student to experience the day-to-day operations in specified focused work areas. Internships can be customized to include the students’ particular area of interest through experience or through special projects. The intern will have the opportunity to attend educational and social events such as trade shows, seminars, in-house training and our company picnic. The intern program features an initial goal setting plan at the start of the internship with a review of the program and goal achievement at the conclusion of the program. Housing is provided at minimal cost for inters from outside the Chicagoland area.
