Responsible for understanding and being in compliance with Company Environmental Management System (EMS) policies and procedures in the performance of their job duties.

Report all environmental issues immediately to their supervisor.

Read and understand the company's emergency notification process and will be responsible for reviewing that policy at their work site.

INTERNSHIP STRUCTURE

What is included

An intern will be assigned to a primary location where most of their 'hands on' experience will take place. The primary location will be discussed during the Internship application process and should be decided upon before the Intern starts work.

Examples of the primary locations are the Sow Farm.

In the primary location the intern will experience a 'hands on' experience in all the departments. For example in the Sow Farm Internship an Intern will rotate through the breeding and farrowing department. In the feed mill the departments include receiving, batching and loadout.

Additional Activities

Throughout the Internship the Intern can expect to be invited to attend some additional activities which will show him/her other parts of the Smithfield HPD business. These activities usually take a half to a full day depending on the activity.

Examples of activities are listed below and we will schedule activities that are available to them. These are the activities we will schedule for the Intern.

Feed Mill Tour

Smithfield Packing Plant tour – (not available in all locations)

Farm visit with Smithfield HPD veterinarian

Feed Delivery visit

Feed Dispatch visit

Research Production facility tour –nursery and finishing (if available)

LNM

Boar Stud (if Biosecurity Protocol allows it)

Maintenance

Sustainability Event/Community Service

Corporate Event

Feed Procurement Presentation

Development Plan

During the first week of the Internship an Intern can expect to receive a structured listing of the activities that they will be working on in the primary area. This will be reviewed by Production Management from time to time to make sure the Internship is on track

To apply for the production or milling position please contact Samantha Raynor at SHRaynor@smithfield.com
