

Greetings,

My name is Zachary Anderson, and I graduated from Purdue (College of Agriculture) in the Spring of 2011, with my degree in Biochemistry. I've worked in the Pharma industry for 2 years, then moved on and began working for SABIC in the Chemicals and Specialties Polymers division for the past 6 years.

Currently, I'm a Research Chemist in an Analytical Lab, with my specialties being in Thermal/Rheology and Wet-Lab analysis. We are seeking Science and Engineering students to apply for our Technology Internship Program. This year, our application pool is lower than usual, and I'm wanting to reach out to my alma mater in hopes of generating more interest for students to acquire industry experience prior to entering the industry.

In the attached link, information regarding the program is provided. **Please forward to qualified students** that may be interested in applying for this opportunity. This opportunity is located at the Mt. Vernon, IN site which is about 20 miles west of Evansville, IN.
