

The Farm Clinic-Frankfort, IN.

We are looking for what is best described as a full-time Precision Ag Technician. Most of the time this person will be on the computer creating maps. Any AG Major could have enough interest/ability to learn this system.

Precision AG Technician- - GIS and courses related to Precision Agriculture. AutoCAD experience/knowledge helpful. Creating field maps, grid soil sampling and developing fertility zones through soil analysis, nutrient management and aerial site specific scouting.

Contact for Deborah Hendrickson for more information and to apply.
