USDA-ARS, Livestock Behavior Research Unit

POSITION: Spring Intern Position, 2017

LOCATION: West Lafayette, Indiana

DESCRIPTION OF DUTIES: The position is within the Animal Well-Being Program of the USDA-ARS, Livestock Behavior Research Unit, West Lafayette, Indiana. This particular program is focused on studying animal behavior, stress physiology, immunology, nutrition, and neuroscience to optimize animal welfare. The incumbent will be expected to assist in conducting a series of experiments with cattle, swine and poultry to assess their state of welfare and develop novel management techniques and practices to ensure both productivity and welfare.

Position can start as early as February 6th, if paperwork is completed early January.

Salary: $10.21/hour

Hours: 40 hours/week, maximum 6 month duration.
