Lab Scientist

Join a winning team in an excellent work environment. Rapidly growing regional water treatment company is seeking an experienced Lab Scientist for our Westfield, Indiana office.

This full-time position is to perform and document routine tasks related to processing of water samples and assays using written operating procedures, standard laboratory methods and/or basic laboratory techniques, functions and equipment. This position will also include performing quality control testing of products.

**Essential Job Functions:**

- Performs quality control tests on Weas products.
- Performs laboratory testing on water treatment-related samples – typical equipment involved includes ion chromatography (IC), inductively coupled plasma (ICP), spectrophotometers, and wet method tests.
- Performs corrosion coupon and deposit analyses.
- Assists with reagent inventory management.
- Provides laboratory support such as daily calibration of balances, maintain instrument use manuals and maintains general use forms and labels.
- Prepares solutions and reagents, media, components for sterilization, general laboratory record keeping, record storage, general laboratory cleaning, assists with inventory, and check-in of laboratory supplies for the Microbiology Lab on an as needed basis.
- Prepares culture media and supplies on an as needed basis for the Microbiology Lab.

**Qualification Requirements:**

- Chemistry degree or equivalent experience.
- Experience working in a laboratory setting.
- Strong relevant qualitative and quantitative skills.
- Demonstrated and recognized integrity, sound character, social skills, and leadership ability.
- Ability to multi-task.
- Attention to detail.
- Excellent oral and written communication skills.
- Good computer skills and willingness to learn systems.

Competitive compensation with benefits – insurance, vacation and 401K. Call Jeff Burton or Shivi Selvaratnam, Ph.D. or at (317) 867-4477 or e-mail weas@weasengineering.com.
