

Graduate Research-Scope of Work Agreement for 5th Year Thesis MS

This form is intended to provide a simple student-initiated framework to discuss and identify a research project that can be completed in one year. Discussion and written documentation of expectations is the best practice for providing our students with an outstanding training environment. Identifying a project early will help make sure adequate time is allotted during the students' senior year and grad school year to complete this project.

Your project can change or evolve from this plan but should still be able to be completed in one year.

Date: _____

Student Name: _____ Faculty Mentor: _____

SECTION 1: Trainee Initiated Research Proposal and Research Expectations (Trainee to Complete):

*1. Please provide a brief description of your proposed research objectives, including any personal goals you have, for this semester.*¹ ¹ Tip: Set realistic timelines based on previous experiences. Do not overestimate what you can achieve.
