

Announcement

The Edward M. Curtis Visiting Professorship in Civil Engineering

The Lyles School of Civil Engineering at Purdue University is pleased to announce the availability of the Edward M. Curtis Visiting Professorship in Civil Engineering. This endowed visiting professorship was established to attract internationally renowned visitors to spend an academic year with the faculty and students of the Lyles School of Civil Engineering at Purdue University. The visiting professorship provides funding to support the awardee during the stay.

The Edward M. Curtis Visiting Professorship in Civil Engineering is available annually. For the forthcoming 2024-2025 academic year, the Lyles School of Civil Engineering seeks candidates that will support one of the School's emphasis areas (see <https://engineering.purdue.edu/CE/>) and contribute to one or more of the teaching, mentoring, research and service activities of the School.

Interested applicants must first contact a faculty member in Purdue's School of Civil Engineering who would be willing to serve as a host during their stay (see <https://engineering.purdue.edu/CE/People/Faculty/>). Once a host faculty member is identified, application materials consisting of a statement of qualifications, a description of proposed objectives during the time at Purdue, along with a complete curriculum vitae should be sent to the host faculty member by December 4, 2023. The complete package including the host's letter is due no later than December 11, 2023 to Whitney Freeland (wfreelan@purdue.edu). Candidate selection will be made by February 2024.
