Company Overview

MAC Construction can provide your turnkey solutions offering both civil and mechanical services. This includes assistance in design and value engineering, clearing and demolition, earthwork, foundations, structural concrete, mechanical systems and everything in between. **MAC** performs these services with it's own workforce and equipment, subcontracting only to specialty trades, providing extra control and strict adherence to schedules. **MAC** operates its own truck fleet via W Transfer and Hot Mix Asphalt (HMA) Plant and can provide asphalt pavement needs for roadways and parking lots. Services include:

- Heavy Civil, Mechanical, and Structural
- Design and Value Engineering
- Clearing
- Demolition and Debris Removal Earthwork
- Road Construction
- Sewer, Water, Storm, and other Underground Utilities
- Drainage
- Sheet piling and Piling
- Structural Concrete (Foundations and Structures)
- Architectural Concrete
- Decorative Pavers
- Stamped Concrete
- Mechanical Piping Systems
- Finish Grading, Seeding and Sodding
- Landscaping
- Asphalt Pavement
