Workshop Structure
This workshop is planned to allow the participant to design their own schedule. You may change classrooms at break and attend the session which is of the most benefit to your particular job description.

Who Should Attend
This workshop will be beneficial for county highway personnel, city street personnel, engineers, supervisors, county commissioners, public works directors, as well as contractors, and engineering consultants who deal with repair, maintenance, design, and construction of stone & gravel streets, roads, and alleys.

Course Content
This workshop will consist of two classrooms. Each will feature a different aspect of aggregate surface roads. Classroom I will be designed for maintenance crews covering a complete look at the world of stone and gravel roads. Classroom II will address what’s new in the aggregate industry from dust control to testing and quality control. Vendors will also have booths on-site.

Course Presenters
We are pleased to have Ken Skorseth co-author of the Federal Highway Administration Gravel Roads Maintenance and Design Manual as a presenter. Ken is the Field Services Manager from the South Dakota LTAP Center and will be sharing his knowledge and skill on this subject. Each session in classroom two will be lead by industry representatives who have hands on experience with the aggregate industry.
