Purdue Student Awarded Civil Engineering Scholarship

West Lafayette, IN (April 10, 1009) – The Schneider Corporation, Indiana's largest civil engineering, GIS and land surveying company, awarded Derek Anger, a civil engineering student in his junior year at Purdue, with a scholarship for the Spring 2009 semester. Anger was awarded the scholarship at a reception held at the 2008 – 2009 ASCE Year In Review Banquet at Purdue on Wednesday. He was chosen from a group of applicants from the Purdue student chapter of the American Society of Civil Engineers (ASCE).

Anger was selected by a panel consisting of Schneider representatives and the Internal Awards Committee (members from the Purdue School of Civil Engineering). The purpose of the scholarship is to honor a student who demonstrates leadership skills in the Purdue chapter of ASCE.

Anger was chosen for this year's scholarship due to his active membership in ASCE, as well as his recent leadership in steel bridge competitions. As team captain, he worked with corporate sponsors to get steel donated year after year and his leadership attributed to increased participation and high return rates.

Schneider has committed to award this honor to an ASCE student member from the Purdue chapter each fall and spring semester.

"We are proud to recognize Derek and to sponsor this scholarship as a testament to the commitment The Schneider Corporation has made to developing and recognizing the next generation of civil engineers," said Dale Grimes, Schneider's West Lafayette Director of Operations.

About The Schneider Corporation: Founded in Indianapolis, Indiana in 1962, The Schneider Corporation is a third-generation, family-owned company. Schneider provides consultative services and solutions which support public and private clients in planning, engineering, and managing growth within their communities. Schneider has assembled the brightest professionals in a variety of disciplines to best serve residential & commercial developers, local, state & federal government, healthcare & life sciences, transportation & utility infrastructure, and corporate & academic campus clients. Schneider employs over 160 professionals and has office locations throughout the Midwest and Southeast. Schneider is WBE-certified with State of Indiana and City of Indianapolis and HUB-certified with the City of Charlotte, North Carolina. Schneider is also one of the only engineering firms to be a Certified Safety Partner with MICCS and is a corporate member of the United States Green Building Council.
