

Vanine Sabino de Moura

vaninesab@gmail.com | vsabinod@purdue.edu

EDUCATION

PhD candidate, Purdue University

MS in Computer Science (Antenna Analysis), 2017, UFPE - Universidade Federal de Pernambuco

BsC in Electronic Engineering, 2013, UFPE - Universidade Federal de Pernambuco

TECHNICAL SKILLS

EM Tools: Ansys HFSS, SIwave CST Microwave Studio Cadence Allegro Fortran, C, C++, Matlab	Measurements: Vector Network Analyzer (VNA) Spectrum Analyzer Time Domain Reflectometer (TDR)	Prototyping: CAM for PCB Prototype
---	--	---------------------------------------

ENGINEERING EXPERIENCE SKILLS

- Antennas and Microwave:
 - Conformal and planar antenna design using Ansys HFSS;
 - Phased array antenna design using Ansys HFSS;
 - Power dividers, resonators and filters design using Ansys HFSS;
 - Prototype: experience using PCB circuit plotters (LPKF);
 - Measurement: experience operating vector network analyzers (VNA) and spectrum analyzers.
- Embedded Systems:
 - Wide knowledge over the entire product design process:
 - Specification requirements;
 - Circuit schematic and layout using Altium Designer;
 - Microcontrollers programming;
 - Mechanical design;
 - Fabrication process (LPKF PCB manufacturing equipments);
 - Tests and measurements.

PROFESSIONAL EXPERIENCE

Companhia Energética de Pernambuco/Universidade Federal de Pernambuco - Brazil
(September/2012 - January/2014) - Internship

- Development of embedded electronic system for controlling a smart antenna array

Motorola Mobility/Universidade Federal de Pernambuco Partnership - Brazil
(March/2013 - January/2014) - Verification Engineer

- Automated and manual testing on newly developed mobile products by Motorola Mobility

Centro de Tecnologias Estratégicas do Nordeste (CETENE) - Ministry of Science and technology - Brazil
(May/2018 - October/2019) - System Engineer

- Design of a real-time monitoring system for traction batteries.

Centro de Tecnologias Estratégicas do Nordeste (CETENE) - Ministry of Science and technology - Brazil
(November/2020 – August/2022) - Researcher

- Design of an IoT (Internet of Things) platform using blockchain technology for precision agriculture.

LANGUAGES

Portuguese: native

English: fluent
