# CONTENTS

## PREFACE

---

## CHAPTER 1 INTRODUCTION: TEACHING ENGINEERING

1.1 Why Teach Teaching Now? .......................... 1
1.2 The Components of Good Teaching .............. 4
1.3 Philosophical Approach .......................... 5
1.4 What Works: A Compendium of Learning Principles .......................... 6
1.5 Chapter Comments ................................ 7
1.6 Summary and Objectives .......................... 8

## CHAPTER 2 EFFICIENCY

2.1 Goal Setting .......................... 11
2.2 Priorities and To-Do Lists .......................... 12
2.3 Work Habits ................................ 14
2.4 Travel ................................ 19
2.5 Teaching Efficiency .......................... 20
2.6 Research Efficiency .......................... 22
2.7 Handling Stress .......................... 23
2.8 Limitations .......................... 25
2.9 Chapter Comments .......................... 26
2.10 Summary and Objectives .......................... 27

Appendix 2A The Rational-Emotive Therapy Approach .......................... 29
CHAPTER 7 NONTECHNOLOGICAL ALTERNATIVES TO LECTURE 114

7.1 Discussion 114
7.2 Cooperative Group Learning 121
7.3 Other Group Methods for Involving Students 128
7.4 Mastery and Self-Paced Instruction 131
7.5 Independent Study Classes: Increasing Curriculum Flexibility 137
7.6 Field Trips and Visits 138
7.7 Chapter Comments 139
7.8 Summary and Objectives 140

CHAPTER 8 TEACHING WITH TECHNOLOGY 143

8.1 Television and Video 145
8.2 Computers in Engineering Education 152
8.3 Audiotutorial Method 161
8.4 Chapter Comments 163
8.5 Summary and Objectives 164

CHAPTER 9 DESIGN AND LABORATORY 168

9.1 Design 168
9.2 Laboratory Courses 179
9.3 Chapter Comments 184
9.4 Summary and Objectives 185

CHAPTER 10 ONE-TO-ONE TEACHING AND ADVISING 189

10.1 Listening Skills 189
10.2 Tutoring and Helping Students 194
10.3 Advising and Counseling 201
10.4 Research Advisers 205
10.5 Chapter Comments 210
10.6 Summary and Objectives 210

CHAPTER 11 TESTING, HOMEWORK, AND GRADING 213

11.1 Testing 214
11.2 Scoring 221
11.3 Homework 226
11.4 Projects 228
11.5 Grading 229
11.6 Chapter Comments 232
11.7 Summary and Objectives 232
## CONTENTS

### CHAPTER 12 STUDENT CHEATING, DISCIPLINE, AND ETHICS

12.1 Cheating 235  
12.2 Other Discipline Problems 238  
12.3 Teaching Ethics 240  
12.4 Chapter Comments 242  
12.5 Summary and Objectives 242

### CHAPTER 13 PSYCHOLOGICAL TYPE AND LEARNING

13.1 From Jung to the MBTI 245  
13.2 Psychological Type: Attitudes and Functions 246  
13.3 Applications of the MBTI in Engineering Education 252  
13.4 Difficulties with Psychological Testing 258  
13.5 Conclusions 259  
13.6 Chapter Comments 259  
13.7 Summary and Objectives 260  
Appendix 13A MBTI Model for Problem Solving 263

### CHAPTER 14 MODELS OF COGNITIVE DEVELOPMENT: PIAGET AND PERRY

14.1 Piaget’s Theory 264  
14.2 Perry’s Theory of Development of College Students 269  
14.3 Chapter Comments 280  
14.4 Summary and Objectives 281

### CHAPTER 15 LEARNING THEORIES

15.1 Constructivism and the Scientific Learning Cycle 284  
15.2 Learning and Teaching Styles 288  
15.3 Kolb’s Learning Cycle 292  
15.4 Motivation 297  
15.5 Chapter Comments 302  
15.6 Summary and Objectives 303

### 16 EVALUATION OF TEACHING

16.1 Formative and Summative Evaluations 306  
16.2 Methods for Doing Student Evaluations 309  
16.3 Student Evaluations: Reliability, Validity, and Extraneous Variables 312  
16.4 Other Evaluation Procedures 318  
16.5 Chapter Comments 321  
16.6 Summary and Objectives 321
17 PROFESSIONAL CONCERNS 324

17.1 Promotion and Tenure 324
17.2 Faculty Environment 331
17.3 Faculty Development 337
17.4 Professional Ethics 340
17.5 Guideposts for Engineering Education (Hougen’s Principles) 342
17.6 Chapter Comments 344
17.7 Summary and Objectives 344

APPENDIX A OBTAINING AN ACADEMIC POSITION 348

APPENDIX B SAMPLE TEACHING COURSE OUTLINE 353
