

## General Education Requirement Exception Form

As of Fall 2019, students admitted to Chemical Engineering, must adhere to the approved list of courses as set by the College of Engineering and School of Chemical Engineering faculty to meet the foundational outcomes for the degree requirements and fulfill expectations as set by ABET, the Accreditation Board of Engineering and Technology.

**Should an intended course of enrollment at Purdue not be included on the approved list, please submit the course syllabus and completed form indicating the requirement, or requirements, to be fulfilled.** Courses taken at another institution, whether coming into Purdue as a direct or indirect course, but not included on the original listing, should do the same for evaluation including the course syllabus for each course to be reviewed.
