

## Catching Up With The Co-Ops!

### Quinn Sandquist

Hometown: Fort Wayne, IN

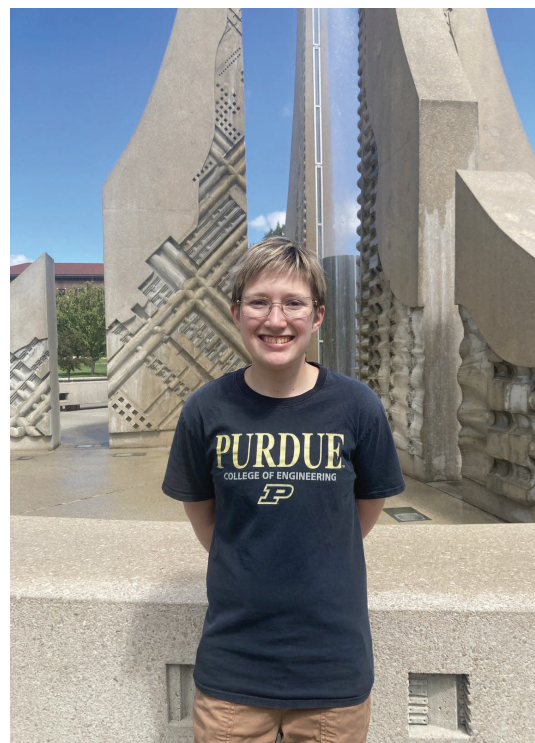

Co-Op Company: Dow Chemical

Location: Midland, MI

AIChE Position: Chapter Relations CM

Q: *What is your favorite part of being a Co-Op student?*

A: My favorite part of being a co-op student is the community with other co-op students, especially in ChemE. Also, being able to pay for college is pretty nice! I wanted to participate in a co-op to gain more work experience and this past semester I was an improvement engineer out in the field completing projects to improve the process of the plant.

### Jeremy Sapp

Hometown: Goshen, IN

Co-Op Company: Lubrizol

Location: Cleveland, OH

AIChE Position: Faculty Relations CM

Q: *What advice do you have for students thinking of participating in the Co-Op program?*

A: There are many different pathways you can take to supplement your semesters in school whether its research, internships, or a Co-Op. No matter what things are going to change, so don't let the change that comes with any of these opportunities scare you away. Although the change may come with challenges, its these challenges that build you to be a reliable, adaptable, and better person overall.
