

U. S. PATENTS

1. R. Agrawal and E. Rodriguez, "System and Method for Electrical Heat Exchanger Apparatus and Reaction Technology (E-HEART)", U.S. Provisional Patent Application No. 63/561,869. Filed March 6, 2024.
2. R. Agrawal, A. S. Nogaja and M. Tawarmalani, "Distillation Heating System and Methods", U.S. Provisional Patent Application No. 63/555,569. Filed February 20, 2024.
3. R. Agrawal and E. Rodriguez, "Turboquenching", U.S. Provisional Patent Application No. 63/347,759. Filed May 2022.
4. R. Agrawal, A. Pradhan, J. W. Turnley, S. Bart and M. C. Uible, "Solution-based deposition approaches for the oxygen-free synthesis of chalcogenide perovskites", Provisional US Patent Application, filed April 11, 2022.
5. R. Agrawal, J. W. Turnley and S. Deshmukh, "Direct Solution Deposition of Metal Selenide Semiconductors Using Novel Metal-Selenium Complexes and Films Made Therefrom", Provisional US Patent Application, filed November 7, 2021.
6. W. N. Delgass, R. Agrawal, F. H. Ribeiro, S. L. Yohe and J.C. Degenstein, "Production of Renewable Fine Chemicals and Liquid Fuels", U.S. Patent Application 2016/0272665 A1, Sep. 22, 2016.
7. R. Agrawal, M. A. Ashraf and M. Tuinstra, "Photovoltaic Structures for Use in Agriculture Farms", US Patent 12,041,897 B2 (Aug, 2024).
8. R. Agrawal, Z. Chen, and W. P. Oladipupo, "Electrically Heated Dehydrogenation Process", US Patent 12,017,983 B2 (June 25, 2024).
9. R. Agrawal and Y. Li, "Process for Upgrading of Natural Gas Liquids from Shale Gas without Front-End Demethanizer", US Patent 11,912,655 B2 (Feb. 27, 2024).
10. R. Agrawal, P. A. Bermel, and A. N. Perna, "Orientation of Photovoltaic Modules to Minimize Intercepted Radiation in Photovoltaic Aglectric Systems", US Patent 11,646,693 B2 (May. 9, 2023).
11. R. Agrawal, J.J. Siirola, T. Ridha, Y. Li, F. H. Ribeiro, and J. Miller, "Natural Gas Liquids Upgrading Process: Two-Step Catalytic Processes for Alkane Dehydrogenation and Oligomerization", US Patent 11,603,500 B2 (Mar. 14, 2023).
12. R. Agrawal, Z. Chen, and W. P. Oladipupo, "Electrically Heated Dehydrogenation Process", US Patent 11,578,019 B2 (Feb. 14, 2023)
13. R. Agrawal and Z. Chen, "Process to Produce Alkenes from Shale Gas", US Patent 11,434,184 B2 (2022).
14. R. Agrawal and Z. Chen, "Systems and Process for Upgrading Natural Gas Liquids from Shale Gas", US Patent 11,402,153 B2 (2022).
15. R. Agrawal and Y. Li, "Process for Upgrading of Natural Gas Liquids from Shale Gas without Front-End Demethanizer", US Patent 11,339,104 B2 (2022).

16. R. Agrawal and W. P. Oladipupo, "Methane Ethane Crackers", US Patent 11,267,768 B2 (2022).
17. R. Agrawal, B. W. Boudouris, R. B. Balow, "Solution Based Synthesis of Copper-Arsenic-Chalcogen Derived Nanoparticles", US Patent 10,333,045 B2 (2019).
18. W. N. Delgass, R. Agrawal, F. H. Ribeiro, B. Saha, S. L. Yohe, M. Abu-Omar, T. Parsell, P. J. Dietrich and I. M. Klein, "Catalytic Biomass Conversion Methods, Catalysts, and Method of Making the Same", U.S. Patent 9,783,474 B2, (2017).
19. R. Agrawal, R. -H. Zhang, B. C. Walker and C. Handwerker, "Homogeneous Precursor Formation Method and Device Thereof" U.S. Patent 9,738,799 B2, (2017).
20. R. Agrawal and B. C. Walker, "Homogeneous Mixtures for Nanoparticle Synthesis", U.S. Patent 9,630,845 B2, (2017).
21. R. Agrawal and G. Madenoor Ramapriya, "Multicomponent Dividing Wall Columns" U.S. Patent# 9,504,934 B2 (2016).
22. R. Agrawal, H.W. Hillhouse and Q. J. Guo, "Synthesis of Multinary Chalcogenide Nanoparticles Comprising of Cu, Zn, Sn, S, and Se", U.S. Patent#9,093,190 B2 (2015).
23. R. Agrawal, Q. J. Guo and H.W. Hillhouse, "Selenization of Precursor layer containing CuInS₂ Nanoparticles", US Patent#8,722,447B2, (2014)
24. R. Agrawal and N. R. Singh, "System and Process for Producing Synthetic Liquid Hydrocarbon", US Patent#8,444,725 B2, (2013).
25. R. Agrawal and N. R. Singh, "Integrated Gasification-Pyrolysis Process", US Patent#8,217,210 B2, (2012).
26. R. Agrawal, M. Agrawal and N. R. Singh, "Process for Producing Liquid Hydrocarbon by Pyrolysis of Biomass in Presence of Hydrogen from a Carbon-free Energy Source", US Patent#8,217,211 B2, (2012).
27. Q.J. Guo, R. Agrawal and H.W. Hillhouse, "Rapid Synthesis of Ternary and Multinary Chalcogenide Nanoparticles", US Patent # 7,829,059B2 (2010),
28. P. Higginbotham, R. Agrawal, A. A. Brostow, K. G. Hayes, D. M. Herron and D. P. O'Connor, "Process and Apparatus for the Cryogenic Separation of Air", US Patent #6,662,593 B1 (2003).
29. J. Xu, D. L. Rarig, T. A. Cook, K-K Hsu, M. Schoonover and R. Agrawal, "Pressure Swing Adsorption Process with Reduced Pressure Equalization Time", U. S. Patent #6,565,628 B2 (2003).
30. R. Agrawal, "Improved Batch Distillation", U. S. Patent #6,550,274 B1 (2003).
31. R. Agrawal, Z. T. Fidkowski, D. M. Herron and W. C. Kottke, "Method and System for Cryogenic Refrigeration", U. S. Patent #6,484,516 B1 (2002)
32. Z. T. Fidkowski, J. F. Cirucci, R. Agrawal and T. E. Conway, "A Process for Concentrating Fluorine Compounds", U. S. Patent # 6,457,327 B1 (2002).

33. J. Xu, M. R. Pillarella, D. P. Dee, and R. Agrawal, "Single Bed Pressure Swing Adsorption Process", U. S. Patent #6,425,938 B1 (2002).
34. W. T. McDermott, R. C. Ockovic, A. Schwarz and R. Agrawal, "Reclamation and Separation of Perfluorocarbons Using Condensation", U. S. Patent #6,383,257 B1 (2002)
35. R. Agrawal, T. A. Daugherty and M. J. Roberts, "Gas Liquefaction Process with Partial Condensation of Mixed Refrigerant at Intermediate Temperatures", U. S. Patent #6,347,532 B1 (2002).
36. M. J. Roberts, R. Agrawal, and T. L. Daugherty, "Single Mixed Refrigerant Gas Liquefaction Process", U. S. Patent #6,347,531 B1 (2002).
37. M. J. Roberts and R. Agrawal, "Hybrid Cycle for the Production of Liquefied Natural Gas", U. S. Patent #6,308,531 B1 (2001).
38. A. A. Brostow, R. Agrawal, D. M. Herron and M. J. Roberts, "Process for Nitrogen Liquefaction", U. S. Patent #6,298,688 B1 (2001).
39. R. Agrawal, "Process for Multi-component Separation", U. S. Patent #6,286,335 B1(2001).
40. Z. T. Fidkowski, J. F. Cirucci, R. Agrawal, S. R. Suchdeo and S. R. Auvil, "Purification of Nitrogen Trifluoride by Continuous Cryogenic Distillation", U. S. Patent #6,276,168 (2001).
41. M. J. Roberts and R. Agrawal, "Dual Mixed Refrigerant Cycle for Gas Liquefaction", U. S. Patent #6,269,655 B1 (2001).
42. D. M. Herron and R. Agrawal, "Process for the Purification of a Major Component Containing Light and Heavy Impurities", U. S. Patent #6,263,701 B1 (2001).
43. R. Agrawal, J. Xu, "Multieffect Distillation for Multi-component Separation", U. S. Patent #6,263,700 B1 (2001).
44. R. Agrawal, "Process for Separation of Multi-component Fluids Using a Multizone Distillation Column", U. S. Patent #6,250,106 B1 (2001).
45. R. Agrawal, D. M. Herron and J. S. Choe, "Process for Distillation of Multi-component Fluid and Production of an Argon-Enriched Stream from a Cryogenic Air Separation Process", U. S. Patent #6,240,744 B1 (2001).
46. P. Higginbotham, D. M. Herron and R. Agrawal, "Process for the Production of Oxygen and Nitrogen", U. S. Patent #6,227,005 B1 (2001).
47. R. Agrawal, "Multieffect Distillation", U. S. Patent #6,173,584B1 (2001).
48. M. J. Roberts and R. Agrawal, "Dual Mixed Refrigerant Cycle for Gas Liquefaction", U. S. Patent #6,119,479 (2000).
49. R. Agrawal and Z. T. Fidkowski, "Distillation Process to Separate Mixtures Containing Three or More Components", U. S. Patent #6,116,051 (2000).
50. R. Agrawal and Z. T. Fidkowski, "Operable and Efficient Distillation Schemes for Multi-component Separations", U. S. Patent #6,106,674 (2000).

51. D. M. Herron, R. Agrawal and S. J. Cook, "Production of Argon from a Cryogenic Air Separation Process", U. S. Patent #5,970,743 (1999).
52. R. Agrawal and Z. T. Fidkowski "Improved Distillation Schemes for Multi-component Separations", U. S. Patent #5,970,742 (1999).
53. R. Agrawal, D. M. Herron, "Efficient Process to Produce Oxygen", U. S. Patent #5,966,967 (1999).
54. R. Agrawal, D. M. Herron, Y. Zhang, "Multiple Expander Process to Produce Oxygen", U. S. Patent #5,956,974 (1999).
55. D. M. Herron, R. Agrawal "Air Separation with Intermediate Pressure Vaporization and Expansion", U. S. Patent #5,956,973 (1999).
56. R. Agrawal and Z. T. Fidkowski, "Distillation Process to Separate Mixtures Containing Three or More Components", U. S. Patent #5,953,936 (1999).
57. D. M. Herron, R. Agrawal, "An Air Separation Process Using Warm and Cold Expanders", U. S. Patent #5,907,959 (1999).
58. R. Agrawal, D. M. Herron, Y. Zhang, "Single Expander and a Cold Compressor Process to Produce Oxygen", U. S. Patent #5,901,576 (1999).
59. R. Agrawal, D. M. Herron, S. J. Cook, "Distillation Process Using a Mixing Column to Produce at Least Two Oxygen-Rich Gaseous Streams Having Different Oxygen Purities", U. S. Patent #5,865,041 (1999).
60. R. Agrawal and C. C. Latshaw, "Process to Produce Nitrogen Using a Double Column and Three Reboiler/Condensers" U. S. Patent #5,761,927 (1998).
61. R. Agrawal, J. Sorensen, D. W. Woodward, A. R. Smith and S. L. Feldman, "Combustion Turbine and Elevated Pressure Air Separation System with Argon Recovery", U. S. Patent #5,722,259 (1998).
62. T. H., Hsiung, Z. T. Fidkowski and R. Agrawal, "Argon Recovery from Silicon Crystal Furnace", U. S. Patent #5,706,674 (1998).
63. R. Agrawal, Z. T. Fidkowski and D. M. Herron, "Process to Produce Moderate Purity Oxygen Using a Double Column Plus an Auxiliary Low Pressure Column", U. S. Patent #5,701,764 (1997).
64. R. Agrawal and Z. T. Fidkowski, "Process to Produce Nitrogen Using a Double Column Plus an Auxiliary Low Pressure Separation Zone", U. S. Patent #5,697,229 (1997).
65. R. Agrawal and J. Xu, "Separation of Fluid Mixtures in Multiple Distillation Columns", U. S. Patent #5,692,395 (1997).
66. R. Agrawal and Z. T. Fidkowski, "A Three Column Cryogenic Cycle for the Production of Impure Oxygen and Pure Nitrogen", U. S. Patent #5,682,764 (1997).
67. R. Agrawal, Z. T. Fidkowski and L. W. Pruneski, "Ultra High Purity Oxygen Distillation Unit Integrated with Ultra High Purity Nitrogen Purifier. S. Patent #5,682,763 (1997).

68. R. Agrawal and Z. T. Fidkowski, "Process to Produce High Pressure Nitrogen Using a High Pressure Column and One or More Lower Pressure Columns", U. S. Patent #5,682,762 (1997).
69. R. Agrawal and J. Xu, "Separation of Fluid Mixtures in Multiple Distillation Columns", U. S. Patent #5,678,426 (1997).
70. Z. T. Fidkowski, R. Agrawal and S. R. Suchdeo, "Method and Apparatus for Producing Liquid Products from Air in Various Proportions", U. S. Patent #5,678,425 (1997).
71. C. F. Watson, R. Agrawal, P. A. Webley and J. G. Wehrman, "VSA Adsorption Process with Energy Recovery", U. S. Patent #5,656,067 (1997).
72. R. Agrawal, M. S. Chen, A. R. Smith, R. M. Thorogood and T. J. Ward, "High Temperature Oxygen Production for Ironmaking Processes", U. S. Patent #5,643,356 (1997).
73. R. Agrawal and D. M. Woodward "Process for Introducing a Multi-Component Liquid Feed Stream at Pressure P2 into a Distillation Column Operating at Lower Pressure P1", U. S. Patent #5,634,356 (1997).
74. D. M. Herron, R. Agrawal and J. Xu, "Process and Apparatus for the Production of Moderate Purity Oxygen", U. S. Patent # 5,592,832 (1997).
75. R. Agrawal, D. M. Herron and T. R. White, "Production of Ultra high Purity Oxygen from Cryogenic Air Separation Plants", U. S. Patent # 5,590,543 (1997).
76. D. Kang, S. L. Russek, R. Agrawal, D. D. Brengel and E. P. Foster, "Production of Oxygen by Ion Transport Membranes with Steam Utilization. S. Patent #5,562,754 (1996).
77. R. Agrawal, R. Kumar, T. Naheiri and C. F. Watson, "VSA Adsorption Process with Feed/Vacuum Advance and Provide Purge", U. S. Patent # 5,540,758 (1996).
78. R. Agrawal, and J. Xu, "Separation of Fluid Mixtures in Multiple Distillation Columns", U. S. Patent # 5,513,497 (1996).
79. R. Agrawal, D. W. Woodward and L. A. Stapf, "Process for the Cryogenic Distillation of an Air Feed to Produce a Low to Medium Purity Oxygen Product Using a Single Distillation Column System", U. S. Patent # 5,442,925 (1995).
80. R. Agrawal, R. Kumar, T. Naheiri and C. F. Watson, "VSA Adsorption Process with Continuous Operation", U. S. Patent # 5,429,666 (1995).
81. R. Agrawal and D. W. Woodward, "Process for the Cryogenic Distillation of an Air Feed to Produce an Ultra high Purity Oxygen Product", U. S. Patent # 5,425,241 (1995).
82. C. F. Watson, R. D. Whitley, R. Agrawal and R. Kumar, "Vacuum Swing Adsorption Process With Mixed Re-pressurization and Provide Product Depressurization", U. S. Patent # 5,411,578 (1995).

83. R. Agrawal, B. K. Dawson, J. A. Hopkins and J. Xu, "Cryogenic Air Separation Process Producing Elevated Pressure Nitrogen by Pumped Liquid Nitrogen", U. S. Patent #5,355,682 (1994).
84. R. Agrawal, A. K. Modi and W. T. Kleinberg, "Distillation Strategies for the Production of Carbon Monoxide-Free Nitrogen", U. S. Patent # 5,351,492 (1994).
85. R. Agrawal, J. Langston, P. Rodgers and J. Xu, "Triple Column Distillation System for Oxygen and Pressurized Nitrogen Production", U. S. Patent # 5,341,646 (1994).
86. R. Agrawal and S. L. Feldman, "Process to Produce Krypton/Xenon Enriched Stream Directly from the Main Air Distillation Column", U. S. Patent # 5,313,802 (1994).
87. R. Agrawal and S. L. Feldman, "Process to Produce a Krypton/Xenon Enriched Stream from a Cryogenic Nitrogen Generator", U. S. Patent 5,309,719 (1994).
88. R. Agrawal, "Inter-Column Heat Integration for Multi-Column Distillation System", U. S. Patent 5,289,688 (1994).
89. R. Agrawal and W. T. Kleinberg, "Consolidated Heat Exchanger Air Separation Process", U. S. Patent # 5,275,004 (1994).
90. R. Agrawal, D. W. Woodward and J. Xu, "Hybrid Air and Nitrogen Recycle Liquefier", U. S. Patent # 5,275,003 (1994).
91. R. Agrawal and J. Xu, "Multiple Reboiler, Double Column, Elevated Pressure Air Separation Cycles and their Integration with Gas Turbines", U. S. Patent # 5,257,504 (1993).
92. R. Agrawal and T. F. Yee, "Dual Heat Pump Cycles for Increased Argon Recovery", U. S. Patent # 5,255,524 (1993).
93. R. Agrawal, and T. F. Yee, "Vaporization of Liquid Oxygen for Increased Argon Recovery", U. S. Patent # 5,255,522 (1993).
94. J. Xu and R. Agrawal, "Multiple Reboiler, Double Column, Air Boosted, Elevated Pressure Air Separation Cycle and its Integration with Gas Turbines", U. S. Patent # 5,251,451 (1993).
95. R. Agrawal and J. Xu, "Efficient Single Column Air Separation Cycle and its Integration with Gas Turbines", U. S. Patent # 5,251,450 (1993).
96. R. Agrawal and T. F. Yee, "Single Heat Pump Cycle for Increased Argon Recovery", U. S. Patent # 5,245,831 (1993).
97. R. Agrawal and J. H. Frey, "Production of Non Cyclic Polyalkylene Polyamines", U. S. Patent # 5,243,078 (1993).
98. R. Agrawal and D. W. Woodward, "Inter-Column Heat Integration for Multicolumn Distillation System", U. S. Patent # 5,230,217 (1993).
99. R. Agrawal, D. M. Espie, D. P. O'Connor, J. A. Mandler, A. R. Smith and D. W. Woodward, "Process and System for Controlling a Cryogenic Air Separation Unit During Rapid Changes in Production", U. S. Patent # 5,224,336 (1993).

100. R. Agrawal, "Coproduction of a Normal Purity and Ultra High Purity Volatile Component from a Multi-Component Stream", U. S. Patent # 5,218,825 (1993).
101. R. Agrawal, "Cryogenic Process for Producing Ultra High Purity Nitrogen", U. S. Patent #5,205,127 (1993).
102. R. Agrawal, "Recovery of Dissolved Light Gases from a Liquid Stream", U. S. Patent #5,167,125 (1992).
103. R. Agrawal and J. Xu, "Elevated Pressure Air Separation Cycles with Liquid Production", U. S. Patent # 5,165,245 (1992).
104. K. W. Kovak, R. Agrawal, and J. C. Peterson, "Method of Purifying Argon through Cryogenic Adsorption", U. S. Patent #5,159,816 (1992).
105. R. Agrawal and T. E. Cormier, "Use of Liquefied Natural Gas (LNG) Coupled with a Cold Expander to Produce Liquid Nitrogen", U. S. Patent #5,141,543 (1992).
106. R. Agrawal and C. L. Ayres, "Production of Liquid Nitrogen Using Liquefied Natural Gas as Sole Refrigerant", U. S. Patent #5,139,547 (1992).
107. R. Agrawal, "Production of Nitrogen Free of Light Impurities", U. S. Patent #5,137,559 (1992).
108. R. Agrawal, "Liquefied Natural Gas Refrigeration Transfer to a Cryogenics Air Separation Unit Using High Pressure Nitrogen Stream", U. S. Patent #5,137,558 (1992).
109. R. Agrawal and D. W. Woodward, "Cryogenic Process for the Separation of Air to Produce Moderate Pressure Nitrogen", U. S. Patent # 5,129,932 (1992).
110. R. Agrawal, "Cryogenic Process for the Separation of Air to Produce Ultra High Purity Nitrogen", U. S. Patent # 5,123,947 (1992).
111. R. Agrawal and B. E. Farrell, "Cryogenic Production of Krypton and Xenon from Air", U. S. Patent # 5,122,173 (1992).
112. R. Agrawal and D. W. Woodward, "Enhanced Recovery of Argon from Cryogenic Air Separation Cycles", U. S. Patent # 5,114,449 (1992).
113. R. Agrawal and D. W. Woodward, "Cryogenic Process for the Separation of Air to Produce Moderate Pressure Nitrogen", U. S. Patent # 5,077,978 (1992).
114. R. Agrawal, "Triple Distillation Column Nitrogen Generator with Plural Reboiler/Condensers", U. S. Patent # 5,069,699 (1991).
115. R. Agrawal and B. E. Farrell, "Cryogenic Process for the Production of an Oxygen-free and Methane-free Krypton/Xenon Product", U. S. Patent #5,067,976 (1991).
116. R. Agrawal and B. E. Farrell, "Cryogenic Process for the Production of Methane-free Krypton/Xenon Product", U. S. Patent #5,063,746 (1991).
117. T. E. Cormier, R. Agrawal, D. W. Woodward and A. Prentice, "Production of Ultra High Purity Oxygen from Cryogenic Air Separation Plants", U. S. Patent #5,049,173 (1991).

118. R. Agrawal and S. R. Auvil, "Alkylation of Aromatic Amines Over Thermally Pretreated Zeolites", U. S. Patent #5,026,912 (1991).
119. R. Agrawal and D. W. Woodward, "Cryogenic Air Separation Process for the Production of Nitrogen", U. S. Patent #5,006,139 (1991).
120. R. Agrawal and D. W. Woodward, "Nitrogen Generators with Dual Reboiler/Condensers in the Low Pressure Distillation Column", U. S. Patent #5,006,137 (1991).
121. R. Agrawal and D. W. Woodward, "Production of Oxygen - Lean Argon from Air", U. S. Patent #4,994,098 (1991).
122. J. A. Hopkins, R. M. McGuinness, R. Agrawal and S. L. Feldman, "Production of High Purity Argon", U. S. Patent #4,983,194 (1991).
123. R. Agrawal and S. R. Auvil, "Cryogenic Process for Producing Low-Purity Oxygen", U. S. Patent #4,947,649 (1990).
124. D. W. Woodward and R. Agrawal, "Air Separation Process for the Production of Oxygen-Rich and Nitrogen-Rich Products", U. S. Patent #4,936,099 (1990).
125. R. Agrawal, "High Pressure Nitrogen Production Cryogenic Process", U. S. Patent #4,927,441 (1990).
126. R. Agrawal, "Alkylation of Toluenediamine and Para-Phenylenediamine with Isobutylene in the Presence of Acidic, Crystalline Molecular Sieves", U. S. Patent #4,914,237 (1990).
127. R. Agrawal, S. R. Auvil and K. B. Wilson, "Process for the Production of High Pressure Nitrogen with Split Reboil-Condensing Duty", U. S. Patent #4,883,519 (1989).
128. R. Agrawal, M. Deeba and S. R. Auvil, "Alkylation of Aromatic Amines with Olefins on Partially Dealuminated Zeolites", U. S. Patent #4,876,377 (1989).
129. R. Agrawal and S. R. Auvil, "Process for the Production of High Pressure Nitrogen", U. S. Patent #4,872,893 (1989).
130. R. Agrawal and S. R. Auvil, "Process for the Production of High Purity Argon", U. S. Patent #4,834,956 (1989).
131. R. Agrawal, S. R. Auvil and J. S. Choe, "Process for the Production of Argon", U. S. Patent #4,817,392 (1989).
132. J. S. Choe, R. Agrawal and S. R. Auvil, "Process for Recovering Helium from a Multi-Component Gas Stream", U. S. Patent #4,717,407 (1988).
133. S. R. Auvil and R. Agrawal, "Liquefied Gases Using an Air Recycle Liquefier", U. S. Patent #4,715,873 (1987).
134. R. Agrawal and S. R. Auvil, "Liquid Products Using An Air and a Nitrogen Recycle Liquefier", U. S. Patent #4,705,548 (1987).
135. J. S. Choe, S. R. Auvil and R. Agrawal, "Process for Separating Components of a Gas Stream", U. S. Patent #4,701,187 (1987).

136. R. Agrawal and T. E. Cormier, "Air Separation Process", U. S. Patent #4,662,918 (1987).
137. T. E. Cormier and R. Agrawal, "Process for the Separation of Air", U. S. Patent #4,662,917 (1987).
138. R. Agrawal and T. E. Cormier, "Process for the Separation of Air", U. S. Patent #4,662,916 (1987).
139. S. R. Auvil and R. Agrawal, "Process for Recovering Hydrogen from a Multi-Component Gas Stream", U. S. Patent #4,654,063 (1987).
140. R. Agrawal and S. R. Auvil, "Process for the Generation of Gaseous and/or Liquid Nitrogen", U. S. Patent #4,595,405 (1986).
141. R. Agrawal and K. W. Kovak, "Dual Feed Air Pressure Nitrogen Generator Cycle", U. S. Patent #4,543,115 (1985).
142. R. Agrawal and T. E. Cormier, "Process and Apparatus for the Separation of Air", U. S. Patent #4,464,188 (1984).
