

National Science Foundation NSF: Fellowship Trilogy

Night Sessions!

*Graduate Research Fellowship requires US Citizenship or Permanent Residency, and applicants must be either graduating undergraduates or first or second-year graduate students who have not applied previously as a Grad student.

1

GETTING STARTED: 9/1/20 9:00 PM - 10:00 PM

Getting Started: In this workshop, junior undergraduates and 1st & 2nd-yr grad students will begin planning their NSF GRFP applications through learning writing strategies and requirements for competitive applications. Recommended timelines & methods for requesting letters of recommendation will also be explained.

2

PERSONAL STATEMENT: 9/8/20 9:00 PM - 10:30 PM

Personal Statement: The second workshop in the NSF GRFP preparation series emphasizes how to write a competitive personal statement. Topics covered will include how to write in a persuasive tone & how to discern which experiences to include. Undergraduates, first and second yr graduate students, are welcome to register. Note: US Citizenship or Permanent Resident status is required to apply for the NSF Fellowship.

3

RESEARCH STATEMENT: 9/15/20 9:00 PM - 10:30 PM

Research Statement: The final of the three NSF Fellowship workshops for undergrads and graduate students will center on the composition of research statements. Attendees will learn how to refine their research plan into a specific goal with accompanying Broader Impacts and Intellectual Merit. Formatting, supporting details, journal references, and theme connections in their personal statements will be addressed.

WHY SHOULD I ATTEND?

- Receive tips and strategies for submitting a competitive application for the NSF fellowship by attending these meetings.
- NSF Fellowship provides three years of funding for Graduate school.
- Cultivate your grant writing skills to help you later apply for postdoc positions and other awards in your early career.
