

We don't just invent. We innovate.
Researchers come to IBM to make an impact — on the industry and on the world. As the largest IT research organization, IBM Research enables IBM to produce more breakthroughs than any company in the industry, averaging 9.3 patents per day. In Africa, IBM has been changing the way the continent does business for more than 50 years, and as our company continues to grow, we need talented individuals like you.

LEADing to Africa

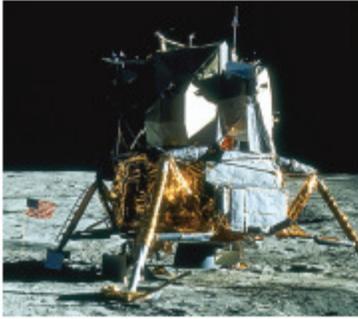

LEADing to Africa, IBM's internship program, has been designed to give you every opportunity to excel. As an intern, this short term assignment will provide you with the experience, skills and contacts you need to start the career you want, at one of the most successful companies in history.

Our LEADing to Africa internships offer a range of first-class opportunities in other IBM Research Labs, where you'll be challenged on a daily basis with exciting work, real projects and real responsibility - all from day one.

If you were surrounded by innovation, what could you achieve?

Looking for a challenge? Interested in making an impact? If you're inspired by technology and innovation, passionate about Africa and looking for an internship with a global leader, you're in the right place. We currently have Research opportunities in Smarter Planet, Mobile, Cognitive Systems, and Human-Computer-Interaction/Visualization/Analytics.

So if you've got big ideas about the future and you're ready to take these ideas to work then we'd like to hear from you. If you're thinking longer term about a job with IBM in Africa, we invite you to learn to more. While we can't guarantee you a job offer upon completion of the program, all high performers will be seriously considered.

For more information about the LEADing to Africa internship program or full time opportunities in Africa and globally, please visit our website. Specific internship postings can be found here:
