

Brown University School of Engineering

Hibbitt Engineering Fellows Program

Brown Engineering is recruiting exceptionally talented researchers who have received their PhD degree in engineering, or an engineering-related discipline, within the past year, or who expect to do so by July 2015, and who aspire to create independent research and pursue careers as leaders of innovation.

Successful candidates will be selected in the fields of biomedical engineering, computer engineering, electrical engineering, fluids and thermal sciences, materials science, mechanics of solids, chemical, biochemical, environmental engineering, and engineering design together with technology entrepreneurship.

The Hibbitt Engineering Fellows will receive an annual salary plus benefits and an additional research and travel stipend. Anticipated start date for these full-time positions is in July 2015.

Applicants are encouraged to submit their materials by April 30, 2015 online through <https://apply.interfolio.com/28252>. The positions will remain open until filled.

Brown University strongly values racial, ethnic, and gender diversity and applicants from all backgrounds are strongly encouraged to apply.

These Fellowships are provided by a generous gift from Susan and David Hibbitt.
