

# The University of Wisconsin-Madison announces new faculty position in the GRAINGER INSTITUTE FOR ENGINEERING

[graingerinstitute.engr.wisc.edu](http://graingerinstitute.engr.wisc.edu)

**ENERGY & SUSTAINABILITY** The College of Engineering at the University of Wisconsin Madison seeks faculty candidates for up to five tenure track faculty positions in the broad area of Energy and Sustainability. *Particular areas of interest include:* Advanced Concepts and Systems for Deep Decarbonization, Optimization and Security of Complex Energy Systems, Energy Harvesting, and Sustainability of resources. The faculty members will be appointed as Grainger Institute Fellows.

The **Grainger Institute for Engineering** serves as a research incubator and provides the infrastructure to address grand technological challenges. Our current hiring focus complements existing efforts in advanced manufacturing, accelerated materials discovery, and computational science and engineering. New research directions will continue to be launched and nurtured within the Institute.

Successful candidates will be expected to maintain a world-class extramurally funded graduate research program on technological problems that are relevant to the needs of the profession and of society. They will also contribute to the education and professional development of undergraduate and graduate students, teach engineering courses, and engage in department, college, university, community, and professional service activities.

**ANTICIPATED START DATE IS FALL 2017.**
