

Health Disparities Across Australia and New Zealand

4 weeks abroad
6 credit hours
May 28 - June 18

\$4964 w/
Purdue Moves Scholarship

STILL ENROLLING, APPLY NOW!

Understanding health in different communities requires examining narratives, beliefs, and meanings unique to every location. In this program, students will meet community leaders and explore Australia and New Zealand to better understand the challenges community members face when helping people in need, specifically those in **Indigenous and Māori communities**.

Come meet us in the Health Disparities Research Lab (Matthews Hall 322) anytime between 10-4pm M-F, ask for Luke.
