

Looking for undergraduate and graduate paid full-time summer interns with a passion for coding (C++/C#), building great software, and being part of a team that is building the next big immersive video calling platform.

Location: Chicago or Urbana, Illinois

Website: <http://www.personify.com/>

Personify is a University of Illinois-born software startup that is a leader in immersive video experiences with 3D/depth cameras (like the Microsoft Kinect, Google Tango, Intel Realsense). Our product is an immersive video collaboration platform that offers an incredible new experience, where users are immersed into a common environment, and able to share documents, video, game experiences in a much more fluid way than ever before. Our platform is powered by some incredible innovations in the image processing/computer vision realm.

For a glimpse of our technology, check out www.personify.com.

What we are looking for:

- Coding experience (C++/C#/Java) with a passion for coding: Software development experience and an understanding of what makes for a
- Experience with working on Windows or Android
- Self-starters that can take a project to completion
- Team players

What can you expect as a Personify intern:

- The start-up experience where everyone's ideas count and your contribution directly impacts our products.
- World-class R&D team: Learn from your peers and teach them a thing or two.
- Working with the absolute latest technologies (many of which, the market has not seen yet): 3D technologies, 3D cameras, mobile.

If you are interested in an internship or full time position at Personify, please send a resume or CV to jobs@personify.com. Reviewing applications until June 2015 or until the role is filled.
