

OPTIMIZING THE magic AS AN INDUSTRIAL ENGINEER

The Disney Parks and Resorts Industrial Engineering team applies a comprehensive set of techniques to conduct highly-complex business analysis. You'll help inspire the magic and push the limits of entertainment with keen problem solving.

With particular focus in the areas of operational planning support, capacity/demand analysis, and productivity/process improvement, our team has an undeniable impact in creating a positive guest experience.

FULL-TIME QUALIFICATIONS

- Experience conducting field studies/data collection efforts and analyses
- Superior analytical ability, conceptual thinking and problem solving
- Strong consulting skills and experience with consulting or quality improvement teams
- Advanced computer skills including spreadsheets, databases, statistical and graphics software
- Strong project management skills, including the ability to manage multiple tasks simultaneously

We are currently hiring at multiple levels for Industrial Engineering teams at *Walt Disney World*® Resort in Orlando, FL and *Disneyland*® Resort in Anaheim, CA.

WHERE WILL YOUR story BEGIN?

We create the magic. A Walt Disney Parks and Resorts Industrial Engineering Professional Internship enables you to gain real-world experience while you learn from industry leaders who will challenge, inspire and develop you.

AN INDUSTRIAL ENGINEER INTERN STORY

Following his sophomore year of college, Alex applied for his first Industrial Engineering Internship with Disney Parks and Resorts where he assisted in the opening of a new venue on Main Street at the Disneyland Park. Alex's internship experience within Industrial Engineering gave him the opportunity to directly connect with Imagineers and Engineering leaders, focusing on sustainability and positive guest experiences. He is now a full-time member of the Industrial Engineering team.

"You're working directly with the Imagineers on their creative concepts. I think the greatest advice I would give to an Industrial Engineering hopeful is to take the first step and apply."
