Site reliability engineering is what keeps Google services up and running 24/7 all over the world without missing a beat. At this workshop, Google engineers will lead you through a mock real-world scenario of how to handle a full system meltdown as you troubleshoot and problem-solve your way back to normal.

**When**
January 30, 2019
6:30PM - 8:00PM

**Where**
Electrical Engineering Building
EE117
Purdue University
