

SIMULIA Takes Mobile Playground on the Road

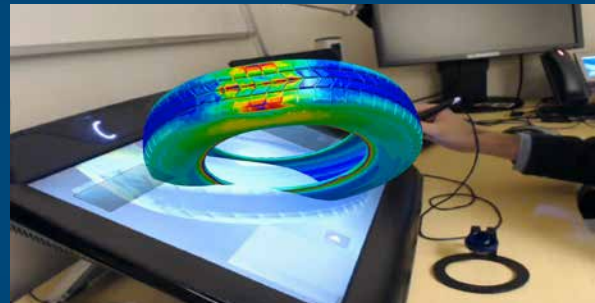

The **3DEXPERIENCE®** Simulation on Wheels tour will travel across the Mid-West this Fall to demonstrate how SIMULIA plays a key role in challenging the status quo and revolutionizing the way we work and think.

On the tour you will find a playground of interactive experiences that showcase the power of simulation through a virtual replication of the real world, the “**3DEXPERIENCE** twin”. As your single source of truth, this enables simulation to be fully integrated throughout concept, design, engineering and manufacturing.

Today, simulation has become an integrated, core component of the product design and development process in all industry sectors. By visiting the tour, you will empower your team to engage with everything simulation can do, enrich conversations and enhance communication throughout your enterprise.

Why Attend:

- Get involved and enjoy the VR experiences
- Attend a technology day
- Enjoy short lectures
- Learn with hands-on workshops
- Compete against your peers in simulation challenges like “Fastest Lap” and “Bridge”
