How do Purdue Engineers spend a semester abroad?

With careful planning, a semester abroad for engineering majors is possible.

Steps for First-Year Engineering Students

Step 1: Visit your academic advisor. Your first year is NOT too early!
Early planning is essential to get the most out of your time abroad. Your academic advisor will help you plan the best time for you to go, as well as assist you in planning your course of study while abroad.

Step 2: Visit the Global Engineering Program Office
Make an appointment in the GEP Office in CIVIL 1259 or call 765-494-8075
- Where do you want to go?
- What do you want to accomplish?
- When would you like to travel?
- Do you have special circumstances?

Step 3: Browse the Study Abroad website to start looking at options
www.studyabroad.purdue.edu has a pre-planning worksheet to help you get started. This is an excellent time to consider taking an appropriate language course, financial planning, and looking at what course options you have.

Already a sophomore? It's not too late! Follow the same steps, or just make an appointment with GEP.

Don’t let anything hold you back.
GEP can help you have a great international experience.
Don’t want to study abroad for a semester? There are still programs for you!

Summer, Spring Break, and Maymester are all great options! Come to the GEP office and we can explain the different types of programs and how they can work into your schedule.

- Visit your academic advisor
- Make an appointment with GEP
- Browse the Study Abroad website and consider all options

TO-DO TIMELINE

Year 1

- Make an appointment in the Study Abroad Office
- Visit your school's academic advisor
- Start financial planning
- Take the necessary language

Year 2

Year 3

Year 4

Why Study Abroad?
The world is more integrated than ever. Intercultural skills and international experience are a must have for today's graduates.

Set yourself apart from the rest

Study Abroad shows you are self-reliant, adaptable, and willing to learn about other cultures.

- Complete necessary applications
- Get your courses approved
- Register, and start your adventure
