16 of the 24 programs were compared data from 24 short-term study abroad programs at Purdue University.

16 of the 24 programs were

- College of Engineering: 16
- Other Colleges: 8

67% of the programs were College of Engineering
33% of the programs were Other Colleges

See current programs here.

Global Engineering Programs and Partnerships spearhead the GCI and facilitate the implementation of the IDI assessment in all our STEP-Abrroad programs. In addition, many engineering faculty and program leaders have undergone training to more intentionally incorporate global and intercultural competencies into the study abroad curriculum. Current research compares programs that have intensive interventions, some interventions, and no intervention.
