

Client Background:

Hupp Aerospace/Defense, has been providing customized kitting solutions to the aviation and defense sectors since 1997. Some of the kitting solutions they provide for include the Apache and the Black Hawk Helicopters.

Problem Statement:

Hupp Aerospace/Defense is facing challenges in effectively integrating and leveraging the capabilities of its Quantum ERP, Tableau, and recently adopted Wrike software to enhance operational efficiency and decision-making processes.

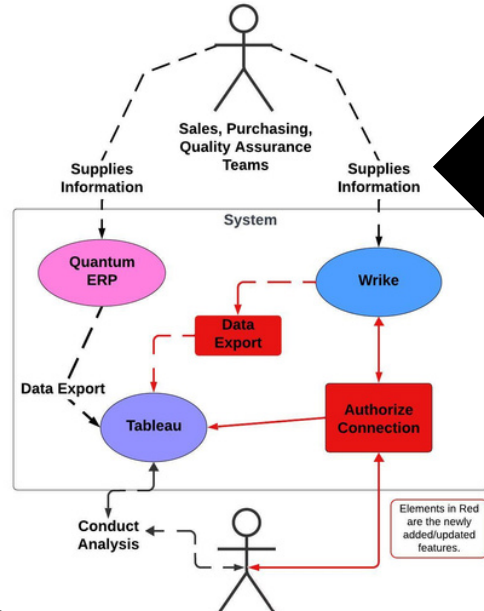

Methodology:

- 1 Data Collection & System Analysis
- 2 System Integration Strategy
- 3 Dashboard Development
- 4 Testing & Adjustments
- 5 Documentation & Training

HUPP

AEROSPACE / DEFENSE

Integrated Operational Framework:

Deliverables & Results:

- Strategic Integration of Quantum ERP, Tableau, and Wrike
- Comprehensive Data Analysis of Quantum & QA Dashboard
- Creation of Wrike SOPs & Tutorial Videos

Conclusion:

With more efficient use of Wrike within their current setup of Quantum ERP and Tableau, Hupp Aerospace is able to access their data more seamlessly from all sources in Tableau, whether for dashboard creation and pulling data for specific use.

Added Features:

Newly Established Wrike & Tableau Integration

Swift Data Export Communication Between BI & CRM

Quality Assurance Dashboard:
