RE: FastTrack changes for MSE core courses.

The faculty of the School of Materials Engineering has approved the following changes to the prerequisites for the MSE plan of study. This action is now submitted to the Engineering Curriculum Committee with a recommendation for approval.

From: MSE 33500 - Materials Characterization Laboratory
Prerequisites MSE 23500

To: Prerequisites MSE 23500, Majors only

From: MSE 36700 - Materials Processing Laboratory
Prerequisites MSE 26000

To: Prerequisites MSE 26000, Majors only

Reason: Students majoring in Materials Engineering all participate in MSE 39000: Materials Seminar which includes topics on laboratory safety and promoting a culture of safety. The MSE laboratory courses are not available as part of the MSE minor program.

David F. Bahr
