Purdue University
Request for Addition, Expiration, or Revision of an Undergraduate Course
(10000-40000 Level)

Department: Engineering Technology
Effective Session: Spring 2012

InSTRUCTIONS: Please check the items below which describe the purpose of this request.

☐ 1. New course with supporting documents
☐ 2. Add existing course offered at another campus
☐ 3. Expiration of a course
☐ 4. Change in course number
☐ 5. Change in course title
☐ 6. Change in course credit type
☐ 7. Change in course attributes (department head signature only)
☐ 8. Change in instructional hours
☐ 9. Change in course description
☐ 10. Change in course requisites
☐ 11. Change in semesters offered (department head signature only)
☐ 12. Transfer from one department to another

Proposed:
Subject Abbreviation: Microprocessor Systems and Interfacing
Course Number: 36200

Existing:
Subject Abbreviation: ECE
Course Number: 36200

Terms Offered:
Check All That Apply:
☐ Summer
☐ Fall
☒ Spring

Campus(es) Involved:
☒ Calumet
☒ Cont Ed
☒ Ft. Wayne
☒ Indianapolis
☐ N. Central
☐ Tech Statewide
☐ W. Lafayette

Course Title: Microprocessor Systems and Interfacing
Abbreviated title will be entered by the Office of the Registrar if omitted. (30 CHARACTERS ONLY)

Credit Type:
1. Fixed Credit: Cr. Hrs.
☐ 4

2. Variable Credit Range:
Minimum Cr. Hrs. (Check One)
☐ To □ Or □

3. Equivalent Credit: Yes ☒ No □

Schedule Type
Lecture Minutes Per Mlig 50 3
Presentation
Laboratory 150 1
Co Lab 15

COURSE ATTRIBUTES: Check All That Apply
1. Pass/No Pass Only
2. Satisfactory/Unsatisfactory Only
3. Repeatability
☐ Maximum Repeatably Credit: 8 Honors
Maximum Credit: 9 Full Time Privilege
5. Fees: Yes ☒ Coop ☐ Lab Rate Request 10 Off Campus Experience
6. Registration Approval Type
Department ☒ Instructor ☐

COURSE DESCRIPTION (INCLUDE REQUISITES/RESTRICTIONS):
Class 3, Lab. 3, Cr. 4. Prerequisites: ECE 26400 & ECE 27000.
An introduction to microcontroller instruction sets, assembly language programming, microcontroller interfacing, microcontroller peripherals, and embedded system design.

**Subject.** (Brief description of proposed change, addition or deletion.)

New Bachelor of Science degree in Electrical & Computer Engineering (BS ECE).

**Justification.** (Briefly list main reasons for proposed change, addition or deletion.)

The freshman engineering program has existed at PNC for many years. Since being approved two years ago, the BS Mechanical Engineering degree, with a Minor in Electrical Engineering, has experienced strong enrollment. Currently, engineering students seeking to major in Electrical & Computer Engineering (ECE) must transfer to West Lafayette or Calumet. The proposed BS ECE Degree will retain many students who would otherwise transfer, thus increasing our enrollment and helping the students to lower the cost of their education.

Use the **Current** and **Proposed** spaces below for course changes only. Otherwise, mark "N/A".

<table>

</tr>
</tbody>
</table>

**Course Objectives.** (For new courses only. List main learning objectives. If lengthy, attach as separate page.)

Students successfully completing this program will:

1. Have a well rounded, quality undergraduate engineering education.
2. Be able to apply applications of modern sciences and technologies.
3. Provide engineering or internship services to local industry.
4. Have been involved in undergraduate research activities.
5. Have been involved in undergraduate engineering competitions and participate in local engineering societies.

**Impact on Students.** (State "N/A" if proposal will not greatly affect students.)

Substantial savings, compared to the cost of transferring to West Lafayette or commuting to Calumet.

**Impact on University Resources.** (State "N/A" if proposal will not require new resources, faculty or funds.)

Program will utilize the existing ECET laboratories and current full- and part-time engineering faculty.

**Impact on other Academic Units.** (State "N/A" if proposal will not affect other units.)

This new degree will help increase enrollment in several areas: Math, Physics, Chemistry and Humanities and Social Sciences.

**TOTAL CREDIT HOURS FOR DEGREE: 124**
Courses to Be Brought from West Lafayette.

**E 208  Electronic Devices and Design Laboratory**
Lab. 3. Cr. 1. Prerequisite: ECE 207. Corequisites: ECE 255.
Laboratory experiments in the measurement of electronic device characteristics. Design of biasing networks, small signal amplifiers and switching circuits.

**ECE 255  Electronic Circuit Analysis and Design**
Class 3, Cr 3. Prerequisites: ECE 201.
Diode, bipolar transistor and FET circuit models for the design and analysis of electronic circuits. Single and multistage analysis and design; introduction to digital circuits. Computer aided design calculations, amplifier operating point design, and frequency response of single and multistage amplifiers. High frequency and low frequency designs are emphasized.

**ECE 264  Advanced C Programming**
Class 2, Cr. 2. Prerequisite: ENGR 181 or ENGR 195E.
Continuation of a first programming course. Topics include files, structures, pointers, and the proper use of dynamic data structures.

**ECE 270  Introduction to Digital System Design**
Class 3, Lab. 3. Cr. 4. Prerequisites: ECE 201 and ECE 207.
An introduction to digital system design, with an emphasis on practical design techniques and circuit implementation.

**ECE 301  Signals and Systems**
Class 3, Cr. 3. Prerequisite: ECE 202.
Classification, analysis and design of systems in both the time- and frequency-domains. Continuous-time linear systems: Fourier Series, Fourier Transform, bilateral Laplace Transform. Discrete-time linear systems: difference equations, Discrete-Time Fourier Transform, bilateral z-Transform. Sampling, quantization, and discrete-time processing of continuous-time signals. Discrete-time nonlinear systems: median-type filters, threshold decomposition. System design examples such as the compact disc player and AM radio.

**ECE 302  Probabilistic Methods in Electrical and Computer Engineering**
Class 3, Cr. 3. Prerequisite: MA 262. Corequisite: ECE 301.

**ECE 308  Systems Simulation and Control Laboratory**
Class 3, Cr. 1. Prerequisite: ECE 207. Corequisite: ECE 362
Instruction and laboratory exercises in the solution of differential equations that arise in the modeling of physical systems. Instruction in the principles of operation and design of linear control systems.

**ECE 311  Electric and Magnetic Fields**
Class 3, Cr. 3. Prerequisites: ECE 201, PHYS 261 & MA 262.
Continued study of vector calculus, electrostatics, magnetostatics, and Maxwell's Equations. Introduction to electromagnetic waves, transmission lines, and radiation from antennas.
Courses to Be Brought from West Lafayette (cont.).

ECE 321 Electromechanical Motion Devices
Class 3, Cr. 3. Prerequisite: ECE 202 or ECE 255.
The general theory of electromechanical motion devices relating electric variables and electromagnetic forces. The basic concepts and operational behavior of dc, induction, brushless dc, and stepper motors used in control applications are presented.

ECE 323 Electromechanical Motion Devices and Systems Laboratory
Lab. 3, Cr. 1. Corequisite: ECE 321.
Experiments closely coordinated with EE 321 involving measurement of fundamental parameters of various electromechanical devices using modern instrumentation techniques. Computer simulation is used to predict steady-state and dynamic operating characteristics. Comparison of predicted and measured performance is emphasized.

ECE 362 Microprocessor Systems and Interfacing
Class: 3, Cr. Lab. 3, Cr. 4. Prerequisites: ECE 264 & ECE 270.
An introduction to microcontroller instruction sets, assembly language programming, microcontroller interfacing, microcontroller peripherals, and embedded system design.

ECE 382 Feedback System Analysis and Design
Class 3, Cr. 3. Prerequisite: ECE 202. Corequisite: ECE 308.
In this course classical concepts of feedback system analysis and associated compensation techniques are presented. In particular, the root locus, Bode diagram and Nyquist plot are used as determinants of stability.

E 402 EE Design Projects
Class 1, Lab. 6, Cr. 3. Prerequisite: Senior standing.
Lecture sessions provide the student with background information on the design and management of projects. Formal lectures cover, for example, design for manufacturability, design for quality, test and evaluation, reliability and ethics, patents and copyrights, plus case studies. During the laboratory sessions the students work in teams on a challenging open-ended electrical engineering project that draws on previous course work. Projects routinely involve standard design facets (such as consideration of alternative solutions, feasibility considerations and detailed system descriptions) and include a number of realistic constraints (such as cost, safety, reliability, and aesthetics).

ECE 438 Digital Signal Processing with Applications
Class 3, Lab. 3, Cr. 4. Prerequisites: ECE 301 & ECE 302.
The course is presented in three units. Foundations: the review of continuous-time and discrete-time signals, and spectral analysis; design of finite impulse response and infinite impulse response digital filters; processing of random signals. Speech processing: vocal tract models and characteristics of the speech waveform; short-time spectral analysis and synthesis; linear predictive coding. Image processing: two dimensional signals, systems, and spectral analysis; image enhancement; image coding; image reconstruction. The laboratory experiments are closely coordinated with each unit. Throughout the course, the integration of digital signal processing concepts in a design environment is emphasized.

ECE 440 Transmission of Information
Class 3, Lab. 3, Cr.: 4. Prerequisites: ECE 301 & ECE 302.
Analysis and design of Analog and Digital Communication Systems. Emphasis on engineering applications of theory to communication system design. The laboratory introduces the use of advanced engineering workstations in the design and testing of communication systems.
### REQUEST FOR ADDITION, EXPIRATION, OR REVISION OF AN UNDERGRADUATE COURSE (10000-40000 LEVEL)

**DEPARTMENT:** School of Electrical and Computer Engineering (EFD 5-12)  
**EFFECTIVE SESSION:** Spring 2012

**INSTRUCTIONS:** Please check the items below which describe the purpose of this request.

TO: The Faculty of the College of Engineering

FROM: The Faculty of the School of Electrical and Computer Engineering

RE: Change to Existing Undergraduate Course: ECE 36200, Microprocessor Systems and Interfacing, change in requisites.

The faculty of the School of Electrical and Computer Engineering has approved the following changes to an existing course. This action is now submitted to the Engineering Faculty with a recommendation for approval.

From: ECE 36200 Microprocessor Systems and Interfacing
Sem. Fall and Spring; Cr. 4; Lecture 3.
Prerequisites: ECE 27000 and (Undergraduate level CS 15900 or Undergraduate level ENGR 11700) and Undergraduate level ECE 25500 [may be taken concurrently].
Restrictions: Must be enrolled in one of the following: School of Electrical & Computer Engineering
Description: An introduction to microcontroller instruction sets, assembly language programming, microcontroller interfacing, microcontroller peripherals, and embedded system design.

To: ECE 36200 Microprocessor Systems and Interfacing
Sem. Fall and Spring; Cr. 4; Lecture 3.
Prerequisites: ECE 27000 and (CS 15900 or ENGR 11700)
Restrictions: Must be enrolled in: School of Electrical & Computer Engineering
Description: An introduction to microcontroller instruction sets, assembly language programming, microcontroller interfacing, microcontroller peripherals, and embedded system design.

Reason: The Computer Engineering faculty in ECE has determined that ECE 2700 and CS 15900 are sufficient as the only prerequisites for ECE 36200.

[Signature]

on behalf of V. Balakrishnan, Head
School of Electrical and Computer Engineering

APPROVED FOR THE FACULTY
OF THE SCHOOLS OF ENGINEERING
BY THE ENGINEERING
CURRICULUM COMMITTEE

ECC Minutes #5
Date 10/17/11
Chairman ECC R. Cipra
Course Learning Outcomes:

i. an ability to write programs for a microcontroller in assembly language. [1,4; e,k]
ii. an ability to interface a microcontroller to various devices. [1,3,4; a,b,c,e,k]
iii. an ability to effectively utilize microcontroller peripherals. [3,4; j,k]
iv. an ability to design and implement a microcontroller-based embedded system. [3,4,5; a,c,d,e,g,k]
