RE: Deletion of ABE 55600

The faculty of the Department of Agricultural and Biological Engineering have approved the deletion of the following course. This action is now submitted to the Engineering Faculty with a recommendation for approval.

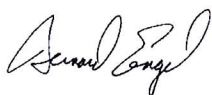

ABE 55600 Biological and Food Process Design

Sem 1, Class 3, Lab 2, Cr. 4

Prerequisites: CHE 37800

The course will focus on the synthesis, creation, evaluation and optimization of a preliminary process design to convert basic biological materials into a finished product. Concepts of materials and energy balances, thermodynamics, kinetics, transport phenomena of biological systems will be used to design processes to minimize energy and environmental impacts, and evaluate economic factors while maintaining product quality. Group projects, written and oral reports.

Reason: This course will be replaced by ABE 55800 (credits) which will include the most essential information from ABE 55600. The reduction in course content and credit hours will help the Department meet the 128 credit constraint for the Biological Engineering plan of study.
