

# Manufacturing Technology Introduction

February 2011

Manufacturing Technology Division

AFRL/RXM

Approved for public release; distribution is unlimited.

PA clearance #88ABW-2011-0736

# Outline

- **Charter/Mission/Roles**
- **Organization/People**
- **Planning Process**
- **Major Projects**
- **Vision/Strategy**
- **Key Takeaways**

# AFRL/RX Manufacturing Portfolio Overview

**Partnerships for Strong Industrial Base Capability for the Warfighter**

Warfighters

## Objectives

- **Reduced Costs** for Acquisition & Sustainment
- **Reduced Time** for Tech Transition / Manufacturing / Maintenance
- **Reduced Risk** when introducing **New or Improved System Capabilities**
- **Increased Availability** of technologies, materials, or components through shaping of industrial base

**Manufacturing & Industrial Readiness Core Competencies for the USAF**

+ Ind Base Assess • OSD Mfg S&T • DPA Title-III • DPAS

# AF ManTech Mission

## ***Strengthening Defense Manufacturing Capabilities!***

### U.S.C. Title 10, Section 2521: Manufacturing Technology

- “...development and application of advanced manufacturing technologies and processes for use to meet manufacturing requirements that are essential to the national defense...”
- “ ...reduce the acquisition and supportability costs of defense weapon systems and reduce manufacturing and repair cycle times across the life cycles...”

### ***Enduring Priorities:***

- **Manufacturing Assurance**: Ensure aerospace industrial and manufacturing readiness for affordable, quality, reliable products to the warfighters
- **Affordable Sustainment**: Develop manufacturing technologies to increase affordability and performance of sustainment systems; transition S&T
- **Affordable Acquisition**: Shift manufacturing considerations earlier in the acquisition framework; work pervasive affordability issues; transition S&T
- **Manufacturing Innovation**: Pursue game-changing manufacturing technologies which transform aerospace industrial base capabilities
- **Quality People & Infrastructure**: Develop and maintain a right-sized workforce for core competencies; build more efficient business practices

# ManTech Investment Selection Criteria

## 1. Is it ManTech? *(a Go/No-Go Decision)*

- Enhances Manufacturability / Producibility / Repair of a Process or Component
- Beyond Reasonable / Normal Industry / Depot Risk
- Requirement Is Defense-essential or Defense-unique
- R&D Feasibility Established
- Current TRL/MRL

**By:**

- Improving an Existing Manufacturing Process
- Establishing a New Manufacturing Process
- Exploiting Business Practices
- Expediting Transition of Emerging Tech

## 2. Warfighter Impact

- Significance to Warfighting Capability (e.g. Svc Core Functions)
- Magnitude of Impact: Capability, Cost, Cycle Time
- System Level Impact, Business Case

## 3. Stakeholder Support/Customer Motivation

- Commitment to Implementation Plan; Cost Share?

## 4. Pervasiveness: Multi-PEO / Multi-command / Multi-system

**Strategic fit/balance with core ManTech Vision**

# Major On-going Programs AF ManTech & Industrial Base

## AESA Radar

- Increased affordability for current/next gen AESA and conformal arrays

## Mfg Readiness Assessments

Material Solution Analysis				Technology Development		Engineering & Manufacturing Development		Production & Deployment	
				A	B		C		
MRL 1 Basic Mfg. Requirements Identified	MRL 2 Mfg. Concepts Identified	MRL 3 Mfg. Proof of Concept Completed	MRL 4 Manufacturing Processes in Lab Environment	MRL 5 Component Production in Production Environment	MRL 6 System or Subsystem in Production Environment	MRL 7 System or Subsystem Representative Environment	MRL 8 Production Conceptualized Ready for JAP	MRL 9 LMP Conceptualized Ready for JAP	MRL 10 JAP Conceptualized Ready for JAP
TRL 1 Basic Feasibility Concept	TRL 2 Concept Formulation	TRL 3 Proof of Concept	TRL 4 Hardware in Lab	TRL 5 Hardware in Production Environment	TRL 6 Prototype in Production Environment	TRL 7 Prototype in Production Environment	TRL 8 System Qualification	TRL 9 System Qualification	TRL 10 Mission Execution

Relationship to Technology Readiness Levels

- Common language/standard for assessing manufacturing maturity – enables rapid, affordable production

## Advanced Propulsion

- Fundamentally changing cost, weight, capability of turbine engines

## Prec Guided Munitions

- Lowering costs and accelerating availability of advanced IMU & seeker technology to the warfighter

## Industrial Base Assessments

- Characterize IB for acquisition and technology decisions/investments

## Datalinks Components

- Increased affordability and production capacity of net centric warfare for ISR, weapons, and space

## Solar Cells

- Increased affordability and sustainability – new industrial base capability

Clearance # 88 ABW-2010-3260

# Today's Fight ... and Tomorrow's Fight

# Vision & Supporting Strategic Thrusts

## Moving Manufacturing Left

- Sponsor early development of game-changing mfg technologies and partner with academia and small business on high risk/high payoff opportunities
- Develop tools and methods that promote early consideration of mfg implications during concept development

## Cradle To Cradle Digital Thread

- Increase digital density across life-cycle and ensure wide access to the same computer-based technical data/description of the product
- Enable increased reusability of materials and components, and optimize impact on the environment

## Next Generation Agile Manufacturing

## Responsive, Integrated Supply Base

- IB capabilities and risks are known, available, and integrated into product development
- 21<sup>st</sup> century supply chain mgmt principles
- Capability for rapid formation of global partnerships

## Factory of the Future

- Next gen mfg technologies developed with process and cost models -- drive the factory and feed the Digital Thread
- Lean & agile, lot size insensitivity
- Green wrt the factory footprint
- Robotics and next gen automation
- Advanced/ wireless factory C2

# AF ManTech Vision and Strategy

## VISION

*Attaining Next Generation  
Agile Manufacturing*

### Strategic Thrusts

- Moving Manufacturing Left
- Cradle to Cradle Digital Thread
- A Responsive, Integrated Supply Base
- Factory of the Future

## AF ManTech Mission

*Strengthening Defense  
Manufacturing Capabilities*

### Enduring Priorities

- Manufacturing Assurance
- Manufacturing Innovation
- Affordable Acquisition
- Affordable Sustainment
- Quality People & Infrastructure

**LONG-TERM  
INFLUENCE ON  
PLANS & EXECUTION**

## Manufacturing Roadmaps

- Advanced Manufacturing Enterprise
- Propulsion Systems
- Aerospace Structures
- C4ISR Hardware
- Armament Systems
- Sustainment / Readiness

**Annual Business Plan**

# Key Takeaways

- **US industrial base capability at risk -- AF must proactively shape and advance industrial base and efficient manufacturing capability**
- **ManTech is the only corporate program working strategic issues and opportunities in manufacturing and industrial readiness**
- **Proven track record of impacts to lab, acquisition, sustainment -- cost, schedule, performance**
- **Strategic plan in place to promote an agile, next generation manufacturing industrial base**

***A Multiplier for Capability and Affordability***
