

PEP

What is PEP?

PEP is **NOT** a student organization, but rather is an opportunity for students who are already returning to their former High Schools to obtain the encouragement & materials for a more structured and successful visit in their former HS Math & Science classes.

PEP **IS** all about helping re-connect current Purdue students with their former High School Teachers and classmates.

Why PEP?

Let's face it students like to hear from students. To those students still in high school, Purdue Students are like rock stars as you are now *in college*.

This combined with the fact that most college students are already going home for long weekend, breaks, and holidays as well as still have connections with their former Math and Science Teacher makes it a great opportunity to reach out and help.

How PEP works?

Purdue Engineering Students contact their former HS teachers and let them know they will be in the area on a certain date and ask if they can come and talk to the class about Engineering Careers and/or Purdue Engineering as well as college life.

After the visit has been scheduled the students will go online and complete the PEP HS Visit Information Form. DJ Wilkinson will use the information from this form to put together a package of information for the student to take with them. The package will include information, give a-ways, and information cards.

What Dates would be good for PEP?

October Break
Thanksgiving Break
Winter Break
Spring Break
May Mester

WiifM (What's in it for Me?)

A great opportunity to give back to your high school and Purdue by encouraging former classmates the benefits of staying focused in math and science as a path to pursuing their dreams, informing them of all the fun things there is to do at Purdue, and most of all the personal experience of knowing you have had a positive influence in the life of a student. Plus surprise prizes for the most visits by a student organization and an individual.

How Do I get started?
